## SECTION II - RISK FACTORS

*An investment in Equity Shares involves a high degree of risk. You should carefully consider all the information in this Draft Red Herring Prospectus, including the risks and uncertainties summarized below, before making an investment in our Equity Shares. The risks described below are relevant to the industries our Company is engaged in, our Company and our Equity Shares. To obtain a complete understanding of our Company, you should read this section in conjunction with the chapters titled “Our Business” and “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on page numbers 124 and 192, respectively, of this Draft Red Herring Prospectus as well as the other financial and statistical information contained in this Draft Red Herring Prospectus. Prior to making an investment decision, prospective investors should carefully consider all of the information contained in the section titled “Restated Consolidated Financial Information” beginning on page number 190 of this Draft Red Herring Prospectus.*

*If any one or more of the following risks as well as other risks and uncertainties discussed in the Draft Red Herring Prospectus were to occur, our business, financial condition and results of our operation could suffer material adverse effects, and could cause the trading price of our Equity Shares and the value of investment in the Equity Shares to materially decline which could result in the loss of all or part of investment. Prospective investors should pay particular attention to the fact that our Company is incorporated under the laws of India and is therefore subject to a legal and regulatory environment that may differ in certain respects from that of other countries.*

*This Draft Red Herring Prospectus also contains forward looking statements that involve risks and uncertainties. Our actual results could differ materially from those anticipated in these forward-looking statements as a result of many factors, including the considerations described below and elsewhere in the Draft Red Herring Prospectus. These risks are not the only ones that our Company faces. Our business operations could also be affected by additional factors that are not presently known to us or that we currently consider to be immaterial to our operations. Unless specified or quantified in the relevant risk factors below, we are not in a position to quantify financial or other implication of any risks mentioned herein.*

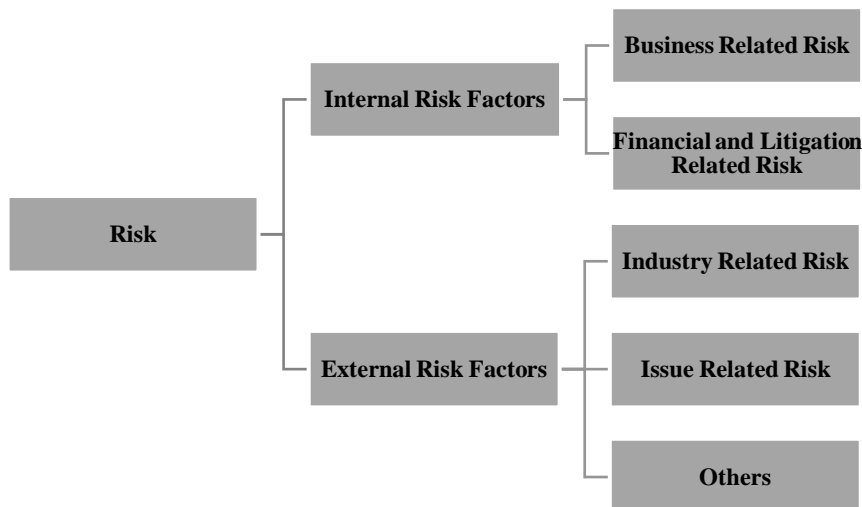

*Unless otherwise indicated or the context otherwise requires, in this section, references to “we”, “us” and “our” are to “Amtech Esters Limited” along with our subsidiary namely, “Croda Pigments Private Limited”.*

### Materiality

The Risk factors have been determined based on their materiality, which has been decided based on following factors:

1. Some events may not be material individually but may be material when considered collectively.
2. Some events may have an impact which is qualitative though not quantitative.
3. Some events may not be material at present but may have a material impact in the future.

### Classification of Risk Factors

## INTERNAL RISK FACTORS

- 1) *A significant portion of our revenue is derived from unsaturated polyester resins. Such significant dependence on a single product category exposes us to concentration risk, whereby any adverse change in demand, pricing pressure, supply of raw materials etc. could have an adverse effect on our business, financial condition, and results of operations.*

Our Company is engaged in the B2B business of manufacturing of Unsaturated Polyester Resins (referred as “UPR” or “UPRs”) and trading in their complementary products like fiber resins, hardeners, silicones and other ancillary products. As such, we derive a significant portion of our revenue from operations from UPR product. The table set forth below provides a product wise split of our revenue from operations for the period ended November 30, 2025, and for the financial years ended March 31, 2025, March 31, 2024, and March 31, 2023, on consolidated basis.

(₹ in lakhs)

\*(%) of revenue From Operations.

Any loss or significant reduction in our revenue from our UPR product for any reason including due to limitation to meet any change in quality specification, customization requirements, or change in technology, disputes with a customer, any adverse effects of our products, adverse changes in the financial condition of our customers, such as possible bankruptcy or liquidation or other financial hardship could have a material adverse effect on our business, results of operations, financial condition and cash flows. While we have not encountered any loss of revenue from our UPR product for the period ended November 30, 2025, and years ended March 31, 2025, March 31, 2024, and March 31, 2023, we cannot assure that the same shall be continued in future.

- 2) *Majority of our revenue from operations is derived from our manufacturing vertical. Further all of our manufacturing facilities are situated at Haryana, which exposes us to operational risks in relation to our manufacturing process. Any disruption, slowdown, or shutdown in our manufacturing operations, could adversely affect our business, results of operations, financial condition and cash flows.*

Our business is dependent on our manufacturing vertical for majority of our Revenue from Operations. The details of vertical wise bifurcation of our Revenue from Operations are as follows:

(₹ in lakhs)

Nature of Activity	For the period ended November 30, 2025		For the year ended March 31, 2025		For the year ended March 31, 2024		For the year ended March 31, 2023

Trading	322.48	12.56%	438.16	11.88%	439.92	17.88%	599.23	26.96%
<b>Total Revenue from Operations</b>	<b>2,568.17</b>	<b>100.00%</b>	<b>3,688.69</b>	<b>100.00%</b>	<b>2,460.38</b>	<b>100.00%</b>	<b>2,222.90</b>	<b>100.00%</b>

Our manufacturing facilities are situated at Haryana, which exposes our company to significant operational risks due to our reliance on a particular state for all of our production needs. Additionally, our proposed manufacturing facility is also located

in Asoda, Haryana. The details of our manufacturing facilities can be referred from the heading “Land and Properties” in the chapter “Our Business” beginning on page no. 124. Any disruption or shutdown of operations at this facility, whether due to natural disasters, fire, equipment failure, labour disputes, changes in general economic conditions, regulatory issues, changes in local government policies or any other unforeseen circumstances, could severely impact our ability to manufacture and supply products in a timely manner. Further, any significant malfunction or breakdown of our machinery, our equipment, our reactors, our automation systems, or any other part of our manufacturing processes or systems (together, our “Manufacturing Assets”) may entail significant repair and maintenance costs and cause delays in our operations.

We cannot assure you that we shall not experience any malfunction or breakdown of our Manufacturing Assets in the future. If we are unable to repair our Manufacturing Assets in a timely manner or at all, our operations may need to be suspended until we procure the appropriate Manufacturing Assets to replace them. In addition, we may be required to carry out planned shutdowns of our facility for maintenance, statutory inspections, customer audits and testing, or may have to shut down for capacity expansion and equipment upgrades. Events like these can have cascading impact on our revenues.

The concentration of manufacturing facility at one location increases our vulnerability to regional risks and limits our ability to respond to demand fluctuations or scale production in the event of increased market demand. Any prolonged disruption at our manufacturing facility could lead to a delay or inability to fulfil customer orders, potentially harming our relationships with customers, and leading to a loss of market share. Furthermore, our dependence on a single manufacturing unit could lead to increased transportation costs and delivery delays, especially for customers located far from Haryana. There can be no assurance that this concentration of manufacturing capacity will not have a material adverse effect on our business, financial condition and results of operations. While we did not face any such disruptions to our manufacturing unit that materially and adversely affected our results of operations except routine maintenance of our plant and machinery at regular intervals, any such disruptions in the future could adversely affect our business, results of operations, financial condition, and cash flows.

**3) *Our business is manpower intensive. It may be adversely affected by work stoppages, increased wage demands by our employees, or an increase in minimum wages, and if we are unable to engage new employees at commercially attractive terms, it could adversely affect our business, financial condition, cash flows and results of operations.***

Our operations are manpower intensive, and we are dependent on our staff for a significant portion of our operations. Success of our operations depend on availability of labour and maintaining good relationships with our labour force. Shortage of skilled personnel or disruptions caused by disagreements with employees could have an adverse effect on our business, results of operations, financial condition and cash flows. Although we have not experienced any work stoppages at our manufacturing facilities for the period ended November 30, 2025, and in the financial years ended March 31, 2025, March 31, 2024, and March 31, 2023, we cannot assure you that we will not experience disruptions in work or our operations in the future.

Disputes, strikes, work stoppages, work slow-downs or lockouts or other problems with our employees, may adversely affect our ability to continue our business operations. Our inability to effectively respond to such events and rectify any disruption, in a timely manner and at an acceptable cost, could lead to the slowdown or shutdown of our operations or the under-utilization of our manufacturing assets, which in turn may have an adverse effect on our business, financial condition and results of operations.

Our success also depends on our ability to attract, hire, train and retain skilled workers. An inability to recruit, train and retain suitably qualified and skilled workers could adversely impact our business, results of operations, financial condition and cash flows.

Further, we are subject to stringent labour laws, and any violation of these laws may lead regulators or other authorities to order a suspension of certain or all of our operations. We may need to increase compensation and other benefits either to attract and retain personnel or due to increased wage demands by our employees, or an increase in minimum wages and that may adversely affect our business, results of operations, financial condition and cash flows. Also, as of the date of this Draft Red Herring Prospectus, our employees are not members of any organised labour unions.

Furthermore, although our attrition rate has decreased over the years, we cannot assure you that attrition rates for our employees will not increase. The details of attrition rate of our company for the period ended November 30, 2025, and for the last three financial years is as follows:

Particulars	For the period ended November 30, 2025	For the year ended March 31, 2025	For the year ended March 31, 2024	For the year ended March 31, 2023
No. of Employees at the beginning	55	53	52	33
No. of Employees Joined	7	5	10	4
No. of Employees Left	3	3	9	1
No. of Employees at the End	59	55	53	36
Average No. of Employees	57	54	52.5	34.5
Attrition Rate %	5.26%	5.56%	17.14%	2.90%

Note: As certified by M/s Kansal Yogesh & Co., Chartered Accountants, by their certificate dated May 29, 2026.

- 4) *We have significant receivables on our books from our customers. Such receivables not realized and turned NPA or any delay in the receivables can have significant impact on the working capital cycle and the overall financial health of the company.*

To effectively manage our trade receivables, we must be able to accurately evaluate the credit worthiness of our customers and ensure that suitable terms and conditions are given to them in order to ensure our continued relationship with them. However, if our management fails to accurately evaluate the terms and conditions with our customers, it may lead to write-offs, bad debts and/or delay in recoveries which could lead to a liquidity crunch, thereby adversely affecting our business and results of operations. A liquidity crunch may also result in increased working capital borrowings and, consequently, higher finance cost which will adversely impact our profitability.

Set out below are details of our trade receivables, trade receivables turnover ratio and debtor days as of and for the periods/years indicated:

Particulars	For the period ended November 30, 2025	For the year ended Year		
		March 31, 2025	March 31, 2024	March 31, 2023
Revenue from Operations (A) (₹ in lakhs)	2,568.17	3,688.69	2,460.37	2,222.90
Trade Receivables (₹ in lakhs)	985.45	688.90	466.93	333.29
Trade receivables turnover ratio (in times)	3.07	6.38	6.15	6.61
Debtor Days	140	68	69	55

Our inability to maintain sufficient cash flow, credit facility and other sourcing of funding, in a timely manner, or at all, to meet the requirement of working capital or pay out debts, could adversely affect our financial condition and result of our operations. In the event we are not able to recover our dues from our trade receivables or sell our inventory, we may not be able to maintain our sales level and thus adversely affecting our financial health.

- 5) *There have been certain instances of non-compliances/ discrepancies, including with respect to certain secretarial/regulatory filings for corporate actions taken by our Company in the past. Such non-compliance may attract penalties against our Company which could impact the financial position of us to that extent.*

Several discrepancies have been noted in our corporate records relating to e-forms filed with the Registrar of Companies. We have obtained a search report on secretarial filing from a Practicing Company Secretary firm namely M/s, Sajal Jain & Associates, Company Secretaries by their report dated May 29, 2026, vide UDIN A043078H000545745. According to that report, there have been certain discrepancies in relation to statutory filings required to be made by the company with the RoC under applicable laws, as well as certain other non-compliances incurred by us under the Companies Act details of which are provided hereunder. The Company has sent an intimation to the ROC informing about discrepancies/ errors via email dated May 29, 2026, and no action has been taken by ROC against us for such inaccurate filings:

1. In e-form MR-1 filed for the FY 2023-24, with respect to the appointment of Ajit Singh Bawa as Managing Director, the date of passing of the Board Resolution was inadvertently mentioned as 15th January 2024 instead of the correct date, i.e., 15th December 2023. The said error was subsequently rectified through the filing of a revised form.

2. Form CHG-4 with respect to satisfaction of charges having charge ID's 10113851, 10067758, 90058915, 90058303 respectively have not been filed by the company. Although, the said charges have been repaid by the company, the same cannot be substantiated due to non-availability of NOC from the concerned banks, on account of the merger of the said banks/financial institutions with their respective successor entities. An intimation in this regard has been mailed by the company to the ROC.

3. Apart from the above, certain clerical errors and discrepancies relating to attachments in the ROC Filings, were highlighted in the PCS Report.

The table below depicts the details of last 5 (five) years delayed filings:

Although, no show cause notice in respect of the above non-compliances has been received by the Company till date, any penalty imposed for such non-compliance in future by any regulatory authority could affect our financial conditions to that extent. As we continue to grow, there can be no assurance that there will be no other instances of such inadvertent non-compliances with statutory requirements, which may subject us to regulatory action, including monetary penalties, which may adversely affect our business and reputation. In case of any action being taken by the regulatory authorities against the Company and/or its officers, the same may have an adverse effect on our business. As a remedial measure, a compliance calendar has been established to track deadlines for filings, approvals, and submissions to ROC.

- 6) *Our Company had negative cash flow from investing and financing activities in the past and may continue to have negative cash flows in the future.*

Our company has experienced negative cash flow from “Operating Activities” for the financial year ended March 2023, primarily due to decrease in trade payable and increase in loans and advances. Our company also experienced negative cash flow from “Investing Activities” for the period ended November 30, 2025, and for the financial year ended March 2025, and March 2024, primarily due to payment for purchase of property, plant and equipment (including CWIP and Goodwill). Furthermore, we have faced negative cash flow from “Financing Activities” for the period ended November 30, 2025, and for the financial year ended March 2025, primarily due to repayment of borrowings and payment of interest. For further details, please refer to the section titled “Restated Consolidated Financial Statements” and chapter titled “Management's Discussion and Analysis of Financial Conditions and Results of Operations” beginning on page 190 and page 192 respectively, of this Draft Red Herring Prospectus.

The detailed break up of cash flows on the basis of Restated Consolidated Financial Statement is summarized in the table below:

Particulars	(₹ in lakhs)			
	For the period ended November 30, 2025	For the year ended Marh 31, 2025	For the year ended Marh 31, 2024	For the year ended Marh 31, 2023
<b>Net cash flow from operating activities</b>	40.77	271.53	197.46	(229.62)
<b>Net cash flow from investing activities</b>	(93.02)	(317.54)	(135.98)	1.56
<b>Net cash flow from financing activities</b>	(59.59)	(93.98)	310.97	226.80

- 7) *We have availed certain cash credit and working capital facilities, and we propose to utilise a portion of the Net Proceeds towards repayment of certain borrowings. Any inability to comply with the terms of such facilities or any future indebtedness may adversely affect our business, results of operations and financial condition.*

As on May 27, 2026, we had total outstanding borrowings of ₹ 432.59 lakhs, comprising cash credit, term loan, other working capital facilities had been availed from banks and financial institutions. These facilities are subject to various terms and conditions, including security requirements, maintenance of stipulated drawing power, financial covenants and operational restrictions. Any breach, delay or inability to comply with such covenants, whether due to internal factors such as working capital fluctuations or external factors such as market conditions, may result in the lenders enforcing security, restricting withdrawals, revising terms, or accelerating the repayment of such borrowings. Such actions may adversely affect our liquidity, business operations and financial performance.

We propose to utilize approximately ₹ 419.73 lakhs from the Net Proceeds of the Offer towards repayment/prepayment of certain outstanding borrowings. While such repayment is expected to reduce our finance costs and improve our leverage position, there can be no assurance that this will mitigate the risks associated with indebtedness, or that we will not require additional borrowings in the future to meet our business or working capital requirements. Further, utilization of Net Proceeds for loan repayment will reduce funds otherwise available for expansion, operational purposes or strategic initiatives. Any inability to efficiently manage our existing or future borrowings, or any adverse changes in the terms of such facilities, may materially and adversely affect our business, cash flows, financial condition and results of operations.

For further details of loans and borrowings availed by the company, please see chapter "Financial Indebtedness" beginning on page 206 of this Draft Red Herring Prospectus.

- 8) *Our manufacturing process involves the use of hazardous and inflammable industrial chemicals which entails significant risks and could also result in enhanced compliance obligations. Failure to adhere to stringent environmental regulations governing hazardous waste, VOC emissions, and pollution control could disrupt operations and result in penalties.*

Our Company is engaged in the manufacturing of unsaturated polyester resins and the trading of fiber resins, hardeners, ancillaries, and silicone products. Consequently, our manufacturing facility utilises various hazardous and inflammable

industrial chemicals and other corrosive raw materials generating volatile organic compounds (VOCs) and producing waste that must be managed in compliance with stringent environmental regulations. As such, our company needs to be in compliance of various rules and regulations including but not limited to Manufacture, Storage and Import of Hazardous Chemical Rules, 1989; Hazardous and Other Wastes (Management and Transboundary Movement) Rules, 2016; Environment Protection Act, 1986; Air (Prevention and Control of Pollution) Act, 198. Any failure to adhere to these regulatory standards, rules could result in fines, operational disruptions, or reputational damage, adversely affecting our business.

While our Company believes that it has necessary controls and processes in place, any failure of such systems, mishandling of hazardous chemicals or any adverse incident related to the use of these chemicals or otherwise during the manufacturing process may cause industrial accidents, fire, loss of human life, damage to our and/or third-party property and/or environmental damages. If any industrial accident, loss of human life or environmental damage were to occur we could be subject to significant penalties, other actionable claims and, in some instances, criminal prosecution. While we incurred no such instances in the past, where any industrial accident, loss of human life or environmental damage has affected any business operations. Any such event would in addition to adversely affecting our reputation also temporarily reduce our manufacturing capacity which could adversely affect our business, results of operations and reputation.

Further, our manufacturing facility, while equipped with modern, automated machinery to ensure high-quality production, the facility remains subject to evolving environmental and safety regulations that could necessitate additional investments in pollution control or waste management systems.

Our extensive product portfolio includes resins used in industries such as automotive, paints, varnishes, FRP sheets, waterproofing, and decorative items. Despite stringent quality control measures, any regulatory changes or environmental compliance failures could disrupt our production processes and supply chain. Additionally, our R&D and Quality Control departments work continuously to refine processes, but any lapses in quality standards or environmental compliance could impact our ability to meet customer demands or contractual obligations.

In our trading operations, we also offer a range of fiber resins, hardeners and silicone products. These materials also require careful handling and compliance with safety and environmental standards. Non-compliance with such regulations could lead to order cancellations, product recalls, and potential product liability claims, impacting our business performance, cash flow, and reputation.

- 9) ***One of the objects of the Issue is to utilise the net proceeds towards investment in the form of loan to our subsidiary for purchase and installation of plant and machinery at its existing manufacturing facility. Any delay or inability in completing the said capital expenditure within the anticipated timelines may adversely affect our financial projections, business operations, and results of operations.***

One of the objects of the Issue is to utilise a portion of the net proceeds towards investment in the form of an unsecured debt to our subsidiary amounting to ₹ 881.42 Lakhs, out of which ₹ 341.42 lakhs is intended to be utilised for the purchase and installation of plant and machinery, intended to enhance the installed and actual production capacity of the subsidiary's existing manufacturing facility. The timely completion of the proposed capital expenditure is subject to various factors, including availability of funds, regulatory approvals, procurement and delivery timelines, vendor/supplier performance, cost escalations, and other unforeseen events. For more information regarding the same, please refer to the chapter titled "Objects of the Issue" on page 80 of the Draft Red Herring Prospectus.

Our proposed Objects of the Offer are based on certain assumptions and estimates, including the anticipated timelines for implementation of our expansion plans. Any increase in costs in our proposed expansion plans, the additional costs shall be paid by our Company from its internal accruals or through debts to be availed from lenders. The setting up cost explained under the "Objects of the Offer", beginning on page 80 of this Draft Red Herring Prospectus, to be purchased is based on the present estimates of our management.

Any delay, cost overrun, or inability of our subsidiary to complete the purchase and installation of plant and machinery or commence enhanced operations or delay in execution of these plans due to various factors, including, but not limited to, delays in obtaining necessary licenses, permits, and approvals from governmental and regulatory authorities, within the anticipated timelines may adversely impact the utilisation of the Issue proceeds and could have an adverse effect on our business

operations, financial condition, cash flows, and results of operations. Further, our investment in the form of a loan to the subsidiary may expose us to risks associated with the performance of the subsidiary, and dependency on the successful execution of the proposed capital expenditure.

**10) Any shortages, delay or disruption in the supply of the raw materials or increase in the cost of raw materials, we use in our manufacturing process due to factors beyond our control may have a material adverse effect on our business, financial condition, results of operations and cash flows.**

We depend on third-party suppliers for certain of our raw materials. The key raw materials that we use for our manufacturing operations include resin and chrome titanium. The following table sets forth our raw materials costs, in absolute terms for the years indicated, and as per the restated consolidated financial information:

(₹ in Lakhs)

Particulars	For the period ended November 30, 2025	For the year ended March 31, 2025	For the year ended March 31, 2024	For the year ended March 31, 2024

We focus on maintaining optimal inventory levels while actively expanding our supplier base. However, fluctuations in the prices of key raw materials, such as resin and chrome titanium, can impact profitability and create market price instability. Further, if we face shortage in raw materials in the future, there can be no assurance that we may be able to acquire the raw materials from the market in a timely manner, or at all, and if we are not able to procure raw materials in sufficient quantities, we may not be able to manufacture our products according to our pre-determined timeframes or as contracted with our customers, at our previously estimated product costs, or at all. Therefore, any shortage, delay or disruption in supply of any of our raw materials could have an adverse effect on our business, results of operations, cash flows and reputation. Despite these risks, we have not faced any such type of shortage or delay in supply of raw materials for the period ending November 30, 2025, and in the preceding 3 (three) financial years. For further details, see “Management’s Discussion and Analysis of Financial Condition and Results of Operations” beginning on page 192 of this Draft Red Herring Prospectus.

Further, fluctuation in the prices of raw material for the production of resins can affect our margins significantly and can compromise our ability to sustain operations and service debt and any financial obligations to any creditors. It can even compromise our sustenance. However, till date we have been successfully able to procure raw materials at competitive rates and also repose confidence in our management’s ability to continue to do so in the future as well.

**11) Our Company is dependent on a few suppliers for purchases of raw material used in our operations. The loss of any of these large suppliers may affect our business operations. Further, we do not have long-term agreements with several of our suppliers.**

Our top ten suppliers accounted for 65.28% and 65.72% for the period ended November 30, 2025, and financial year ending March 31, 2025, respectively on consolidated basis. The following table summarizes the proportion of our top Suppliers to our Total Purchases for the respective period:

If there are any delays or disruptions in the manufacturing facilities of such third-party suppliers, our ability to deliver certain products may be affected. A loss of supplies from one or more of these key suppliers could negatively impact our revenue and operational results. While we believe we can maintain our relationships with existing suppliers and keep finding new ones, there is no assurance that we will be able to sustain these long-term relationships or identify alternative suppliers in a timely manner. Our Company also does not have any long-term contract with any of our suppliers. If we fail to maintain relationships with our suppliers, or if we are unable to secure sufficient spaces, equipment or other transportation or delivery services to meet our commitments to our customers or provide our services on competitive terms, our customers could shift their business to our competitors or other third-party service providers, temporarily or permanently, and our business and results of operations could be materially and adversely affected. In the past three Financial Years, we have not experienced any significant disruptions in the supply of the raw materials. Further, there is no relation between our suppliers and the Promoter/Directors/KMPs of our Company.

**12) A substantial portion of our revenue from operations is dependent upon a limited number of our customers. Any failure to maintain our relationship with these customers or any adverse changes affecting their financial condition will have an adverse effect on our business, results of operations, financial condition and cash flow.**

We do not have any long-term agreements with our customers and operate on a purchase order basis. Our customers may terminate their purchase orders with us, with or without cause and with or without notice, at any time. Loss of all or a substantial portion of sales to any of our top 10 customers, for any reason, including limitation to meet any change in quality specifications, change in technology, disputes with customers, adverse change in the business and financial condition of such customers (including due to possible bankruptcy, liquidation or other financial hardship), decline in their sales, plant shutdowns, cheaper import alternatives, labour strikes or other work stoppages affecting production by such customers, could have a material adverse impact on our business, results of operations, financial condition and cash flows. Although we have not faced any significant loss of customers, or any instances of complaints from our key customers that have materially and adversely affected our results of operations, for the period ended November 30, 2025 or for the years ended March 31, 2025, March 31, 2024 and March 31, 2023, there can be no assurance that we will be able to maintain or increase business from these customers or that we will not lose all or a portion of business from our key customers in the future, and any such failure to retain one or more of our key customers may have a material adverse effect on our business, results of operations, financial condition and cash flows.

**13) There have been instances of delays in payment of statutory dues, i.e. GST by the Company. In case of any delay in payment of statutory due in future by our Company, the Regulatory Authorities may impose monetary penalties on us or take certain punitive actions against our Company in relation to the same which may have adverse impact on our business, financial condition and results of operations.**

In the past, there have been some instances of delays in filing statutory forms and regulatory dues with government authorities such as GST returns. Accordingly, we have been subjected to penalty and charged with interest for delayed deposit of tax on those instances as well. While our Company has already regularized the aforesaid delays, however, there can be no assurance

that the regulator may not initiate proceedings against us or that we will be able to sufficiently defend against any action initiated by regulators in relation to regulatory compliances for all instances and periods. Any adverse order passed, or penalty imposed by regulators on us may adversely affect our business and the results of operations. However, as of the date of this Draft Red Herring Prospectus, there have been no such instances in the past three years and for the period ended November 30, 2025:

**14) We generate a significant portion of our revenue from our operations from the states of Haryana, Delhi and Uttar Pradesh. Any adverse developments affecting our operations in these regions could have an adverse impact on our revenue and results of operations.**

Our business operations are spread across multiple states in India, with each state contributing to our revenue from operations. However, a substantial portion of our revenue from operations for the period ended November 30, 2025, and for the financial years ended March 31, 2025, March 31, 2024, and March 31, 2023, has been generated from the States of Haryana, Delhi and Uttar Pradesh. The Geographical distribution of our revenue from top 3 states on consolidated restated consolidated financial statement is set out below:

(₹ in lakhs)

Such concentration of revenue on few states may have an adverse effect on our business, financial condition, cash flows and results of operations. An economic slowdown or change of laws or regulations, particularly in relation to logistics sector in such few states may have a significant adverse impact on our business, financial condition, cash flows and results of operations. Further, drastic changes in taxes and other levies imposed by the State Government as well as other financial policies and regulations, political and deregulation policies, if changed, could harm the business and economic conditions.

Our expansion into existing & new geographies may also be challenging on account of our lack of familiarity with the social, political, economic and cultural conditions of these new regions, language barriers, difficulties in staffing and managing such operations and reputation in such regions. We may also encounter other additional anticipated risks and significant competition in such markets.

Further, as we enter into new markets and geographical areas, we are likely to compete with not only national players, but also the local players, who might have an established local presence, and are more familiar with local business practices and have stronger relationships with local distributors, dealers, relevant government authorities, suppliers or are in a stronger financial position than us, all of which may give them a competitive advantage over us. Our inability to expand into other areas may adversely affect our business prospects, financial conditions and results of operations. While our management believes that the Company has requisite expertise and vision to grow and mark its presence in other markets going forward, investors should consider our business and prospects in light of the risks, losses and challenges that we face and should not rely on our results of operations for any prior periods as an indication of our future performance.

**15) In addition to the existing indebtedness, our Company, may incur further indebtedness during the course of business. We cannot assure that our Company would be able to service the existing and/ or additional indebtedness.**

As on November 30, 2025, our outstanding borrowings (including fund based and non-fund-based borrowings) was ₹364.34 Lakhs. The table below summarises debt to equity ratio and debt service coverage ratio as per our Restated Consolidated Financial Statements for the period ended November 30, 2025, and financial years ended March 31, 2025; March 31, 2024, and March 31, 2023:

*(in Times)*

Particulars	For the period ended November 30, 2025	For the Year Ended		
		March 31, 2025	March 31, 2024	March 31, 2023
<b>Debt Equity Ratio</b>	0.20	0.26	0.39	0.12
<b>Debt Service Coverage Ratio</b>	4.51	4.43	5.41	2.40

In addition to the indebtedness for the existing operations, of our Company, may incur further indebtedness during the course of their business. Our Company may take additional loans for various strategic and operational reasons, including expanding operations, meeting working capital requirements, refinancing existing debt, funding capital expenditures, pursuing strategic acquisitions, and covering unforeseen contingencies. These actions support growth and operational efficiency, but increased borrowings can impact our debt-equity ratio and borrowing costs. We aim to balance our financing needs with prudent financial management to ensure long-term sustainability and growth. We cannot assure you that our Company will be able to obtain further loans at favourable terms. Increased borrowings, if any, may adversely affect our debt- equity ratio and our ability to borrow at competitive rates. In addition, we cannot assure you that the budgeting of our working capital requirements for a particular year will be accurate. There may be situations where we may under-budget our working capital requirements, which may lead to delays in arranging additional working capital requirements, loss of reputation, levy of liquidated damages and can cause an adverse effect on our cash flows. Any failure to service the indebtedness of our Company or otherwise perform our

obligations under our financing agreements entered with our lenders or which may be entered into by our Company, could trigger cross default provisions, penalties, acceleration of repayment of amounts due under such facilities which may cause an adverse effect on our business, financial condition and results of operations.

**16) We have one outstanding litigation against our director, any adverse outcome of which can affect our business, reputation and results of operations.**

*\*To the extent Quantifiable.*

The amounts claimed in these proceedings have been disclosed to the extent quantifiable. If any new developments arise, such as a change in Indian law or rulings against us by appellate courts or tribunals, we may need to make provisions in our financial statements that could increase our expenses and current liabilities.

We cannot assure you that any of the outstanding litigation matters will be settled in our favour or that no additional liabilities will arise out of these proceedings. In addition to the above, we could also be adversely affected by complaints, claims or legal actions brought by persons, including before consumer forums or sector-specific or other regulatory authorities in the ordinary course of business or otherwise, in relation to our business operations, our intellectual property, our branding or marketing efforts or campaigns or our policies. We may also be subject to legal action by our employees and/or former employees in relation to alleged grievances, such as termination of employment. We cannot assure you that such complaints, claims or requests for information will not result in investigations, enquiries or legal actions by any regulatory authority or third persons against us.

For further details of certain material legal proceedings involving our Company, our Promoters, our directors, see “Outstanding Litigations and Material Developments” beginning on page 207 of this DRHP.

**17) Information relating to the installed manufacturing capacity, actual production and capacity utilization of our manufacturing units included in this Draft Red Herring Prospectus are based on various assumptions and estimates by chartered engineer and the capacity may vary. Under-utilization of our manufacturing capacity and an inability to effectively utilize our expanded manufacturing capacity could have an adverse effect on our business, future prospects, and financial performance.**

Information relating to our installed capacities, historical production and capacity utilization of our Manufacturing facility is based on various assumptions and estimates by M/s Mech India, Chartered Engineer, as set out in their certificate dated May 27, 2026. Such assumptions and estimates may not continue to be true and future production and capacity utilization may vary. Calculation of the installed capacities and historical production and capacity utilization of our Manufacturing facility by the independent chartered engineer may not have been undertaken on the basis of any standard methodology and may not be comparable to that employed by competitors.

As on the date of this Draft Red Herring Prospectus, we operate a Manufacturing Facility in India located in the state of Haryana. The table below sets forth certain information relating to the installed capacity, available capacity, actual production and capacity utilisation for the period ended November 30, 2025, and last three financial years:

<sup>(1)</sup> Our Subsidiary CPPL was acquired by our company in the financial year 2023-24.

Ability to maintain our profitability depends on our ability to maintain high levels of capacity utilization. Capacity utilization is affected by the demand for our products, our ability to accurately forecast customer demand, to carry out uninterrupted operations, the availability of raw materials, and industry/ market conditions. In the event there is a decline in the demand for our products, or if we face prolonged disruptions at our Manufacturing Facility including due to interruptions in the supply of water, electricity or as a result of labour unrest, or are unable to procure sufficient raw materials, we would not be able to achieve full capacity utilization of our Manufacturing Facility, resulting in operational inefficiencies which could have a material adverse effect on our business, financial condition and cash flows. Under-utilization of our manufacturing capacities over extended periods, or significant under-utilization in the short term, or an inability to fully realize the benefits of our recently implemented capacity expansion, could materially and adversely impact our business, future prospects and future financial performance.

**18) Our Company has recently established a new manufacturing facility at Asoda, Haryana and any failure to successfully ramp up operations, achieve optimal capacity utilisation, or generate adequate demand for the additional capacity may adversely affect our business, financial condition, cash flows, and results of operations.**

Our company has recently established a new manufacturing facility for the production of UPRs situated at Asoda, Haryana, however, the said facility is expected to become operational by September 2026. While the Company has prior experience in resin manufacturing, the new facility is in the initial stages of operations and may face risks associated with scaling up production, stabilizing operations, and achieving optimal capacity utilization. The expansion exposes the Company to execution and ramp-up risks, including potential delays in achieving expected production efficiencies, integration of the new facility with existing operations, and higher initial operating costs. Further, there can be no assurance that the new facility will achieve the same level of operational efficiency or cost effectiveness as the Company's existing plant within the anticipated timeframe.

In addition, the Company's ability to derive expected benefits from the new facility is dependent on its ability to generate adequate demand for the additional capacity. Any inability to secure sufficient orders or effectively utilize the expanded capacity may result in under-utilization of the new facility, which could adversely affect the Company's business, financial condition, cash flows, and results of operations. For details regarding said manufacturing facility refer the section titled "Land & Properties" of the Chapter "Our Business" beginning on page 124 of this Draft Red Herring Prospectus.

While all such transactions have been conducted on an arm's length basis and are in compliance with the relevant provisions of Companies Act, 2013 and any other applicable laws and regulations as amended, we cannot assure you that we might not have obtained more favourable terms had such transactions been entered into with unrelated parties. While our Company will endeavour to duly address such conflicts of interest as and when they may arise, we cannot assure you that these arrangements in the future, or any future related party transactions that we may enter into,

individually or in the aggregate, will not have an adverse effect on our business, financial condition, results of operations, cash flows and prospects or may potentially involve any conflict of interest.

For details, please refer to the "Summary of Related Party Transaction" on page 53 under chapter titled "Restated Consolidated Financial Information" on page 190 of this Draft Red Herring Prospectus.

**20) *The property used by the Company for the purpose of its Registered Office is not owned by it. Any termination of the relevant lease agreement in connection with such property or our failure to renew the same could adversely affect our operations.***

We currently operate from our registered office, located at Flat No. 102, Plot No. A-3, Magnum House 1, Commercial Complex, Karampura, New Delhi- 110015, India and the same is not owned by us. We have obtained this property on lease through Lease Deed dated October 24, 2024, for a period of 60 months. Periodic renewals of such lease may increase our costs, since it is subject to rent escalation.

Any non-compliance with the terms or conditions of lease deed, entered into by our Company may result in dispute or legal proceedings against our Company or may even result in termination of lease deed by the lessor, which may have an adverse impact on our business, operations, and cash flows. We cannot assure you that these proceedings will be decided or settled in favour of our Company or that no additional liability will arise out of these proceedings, the outcome of which may affect our business, results of operations, financial condition and prospects. Further, any failure to renew the same and upon favourable conditions, in a timely manner or at all could adversely affect our operations.

For details regarding properties taken on lease refer the section titled "Our Properties" of the Chapter "Our Business" beginning on page 124 of this Draft Red Herring Prospectus.

**21) *Our inability to effectively implement our growth strategies or manage our growth could have an adverse effect on our business, results of operations and financial condition.***

In recent years, we have experienced considerable growth and have significantly expanded our operations. From Fiscal 2023 to Fiscal 2025, as per the Restated Consolidated Financial Statements, (i) our EBITDA increased from ₹ 88.86 lakhs in FY 2023 to ₹ 650.20 lakhs in FY 2025, representing a CAGR of 170.50 %; (iii) our profit after tax increased from ₹ 60.63 lakhs in FY 2023 to ₹ 372.22 lakhs in FY 2025, representing a CAGR of 147.77%. We cannot assure you that our growth strategies will be successful or that we will be able to continue to expand further or diversify our product portfolio.

Our inability to manage our expansion of our product offerings effectively and execute our growth strategy in a timely manner, or within budget estimates or our inability to meet the expectations or track the changing preferences of our customers and other stakeholders could have an adverse effect on our business, results of operations and financial condition. Our future prospects will depend on our ability to grow our business and operations, which could be affected by many factors, including our ability to introduce and innovate new products and maintain the quality of our products, general political and economic conditions in the geographies in which we operate, government policies or strategies in respect of specific industries, prevailing interest rates, price of equipment and raw materials.

In order to manage our growth effectively, we must implement, upgrade and improve our operational systems, procedures and internal controls on a timely basis. If we fail to implement these systems, procedures and controls on a timely basis, or if there are weaknesses in our internal controls that would result in inconsistent internal standard operating procedures, we may not be able to meet our customers' needs, hire and retain new employees or operate our business effectively.

We cannot assure you that our existing or future management, operational and financial systems, procedures and controls will be adequate to support future operations or establish or develop business relationships beneficial to future operations. Failure to manage growth effectively could have an adverse effect on our business and results of operations.

**22) *Several expenses incurred in our operations are relatively fixed in nature, and our inability to effectively manage such expenses may have an adverse effect on our business, results of operations, cash flows and financial condition.***

A portion of the expenses incurred in our operations, such as employee benefit expense, advertisement expense, repair and maintenance expense and power and electricity costs, are relatively fixed in nature. Even if the demand for our products is adversely affected, we will be required to continue to incur such costs to maintain our manufacturing facilities and ensure operational readiness. The table below sets out the details of such expenses for the periods/years indicated:

(₹ in lakhs)

Particulars	For period ended		For the year ended					
	November 30, 2025		March 31, 2025		March 31, 2024		March 31, 2023	
	Total Expense	% of Total Expenses	Total Expense	% of Total Expenses	Total Expense	% of Total Expenses	Total Expense	% of Total Expenses
Employee benefits expense	166.32	7.48%	221.43	6.96%	223.09	9.36%	145.11	6.72%
Advertisement & Sales Promotion	42.22	1.90%	25.50	0.80%	1.24	0.05%	38.14	1.77%
Repair & Maintenance	43.62	1.96%	29.38	0.92%	49.44	2.07%	5.40	0.25%

Our manufacturing facilities may also be subject to increases in property charges, tax or regulatory charges, utility costs, insurance costs and administrative expenses. While we have not incurred any such increase in costs which led to a material effect on our business or operations for the period ended November 30, 2025, and in the past three financial years, any such occurrences in the future may adversely affect our business, results of operations, cash flows and financial condition.

The speciality chemical industry experiences periodic changes in demand and supply, which we may not be able to predict accurately. Consequently, we may be unable to reduce fixed and recurring costs in a timely manner, or at all, in response to a reduction in the demand for our products. As a result, during periods when the demand for our products decreases, the resulting decline in our revenues could have an adverse effect on our net cash flow, margins and profits. This effect can be more pronounced during periods of economic contraction, or slow economic growth. Similarly, when the demand for our products increases, our profitability increases disproportionately to the increase in revenues due to economies of scale and operating leverage. Further, during periods when we shut down our manufacturing facilities for repair and maintenance, we continue to incur certain fixed costs, while not deriving any revenue from such manufacturing facility. Such occurrences could adversely affect our business, results of operations, cash flows and financial condition.

**23) Any conflict of interest which could occur between our business and any other similar business activities pursued by our Directors and Promoters could have a material adverse effect on our business and results of operations.**

Business activities of our Promoter Group Company, Bawa Resins Private Limited is similar to the business activities of our Company. In addition, some of our directors are also directors on the boards of Bawa Resins Private Limited. These overlapping directorships could create conflicts of interest between us and Bawa Resins Private Limited. Conflicts of interests may arise in allocating business opportunities between our Company, and our Promoter Group company's activities in circumstances where our respective interests diverge. Although, presently, there is no such transaction or any activity that can arise to indicate conflict of interest, we cannot assure you that there will be no conflict of interest between us and our Promoter Group Company going forward, or that we will be able to suitably resolve any such conflict without an adverse effect on our business or operations and financial performance. In cases of conflict, our Promoters may favour other companies in which they have an interest. To mitigate these risks, it is essential to establish clear policies and procedures for identifying, disclosing, and managing conflicts of interest.

To mitigate such risks or any other risks that may arise in the future our company has executed a non-compete agreement dated May 20, 2026, with our promoter group company, viz, Bawa Resins Private Limited. Moreover, to uphold corporate governance, such transactions, if entered at all, would be done at an arm's length and only when there is business sense in materiality.

**24) We are subject to strict quality requirements and any product defect issues or failure by us or our raw material suppliers to comply with quality standards may lead to the cancellation of existing and future orders, recalls and exposure to potential product liability claims.**

We face an inherent business risk of exposure to product defects and subsequent liability claims if the use of any of our products results in personal injury or property damage. We may not be able to meet the quality standards imposed by our customers and applicable to our manufacturing processes, which could have a material adverse effect on our business, financial condition, results of operations and cash flows.

If any of our products are defective, we may be, inter alia, (i) responsible for damages relating to any defective products, (ii) required to replace or recall such products or (iii) incur significant costs to defend any such claims. The failure by us or any of our suppliers to achieve or maintain compliance with customer requirements or quality standards may disrupt our ability to supply products sufficient to meet demand until compliance is achieved or, until a new supplier has been identified and evaluated. The quality of raw materials will have an impact on the quality of the finished products and in turn affect our brand image, business and revenue. There is no assurance that our products will always meet the satisfaction of our customers' quality standards. Our failure to comply with applicable regulations could cause adverse consequences to be imposed on us, including injunctions, civil penalties, suspensions or seizures or recalls of products, operating restrictions and criminal prosecutions, all of which could harm our business, financial condition, cash flows and results of operations. Though no such instances have occurred in the past regarding product quality or manufacturing defect, there can be no assurance that if we need to engage new suppliers to satisfy our business requirement, we will be able to locate new suppliers in compliance with customer requirements in a timely manner, or at all. Failure to do so could lead to the cancellation of existing and future orders and have a material adverse effect on our business and revenue.

***25) Any failure to obtain, retain and renew approvals, permits and licenses or changes in applicable regulations or their implementation could have an adverse effect on our business.***

We are subject to numerous governmental regulations and therefore require a number of approvals, licenses, permits, registrations and permissions under several state and local governmental rules in India generally for carrying out our business. Such licenses, permits and authorizations pertain to the manufacturing industry and include, among others, manufacturing permits, factory licenses, and environmental, health and safety permits, such as those required under the Factories Act, 1948, the Water (Prevention and Control of Pollution) Act, 1974, the Air (Prevention and Control of Pollution) Act, 1981, each as amended. For further details regarding pending approval please refer section "Government and Other Statutory approvals" on page 214 of this Draft Red Herring Prospectus.

While we have obtained all the requisite permits and licenses which are adequate to run our business, some of these approvals are granted for fixed periods of time and need renewal from time to time. As such, we cannot guarantee that our permits and licenses would be approved in a timely manner or at all. Also, certain licenses and registrations obtained by our Company contain certain terms and conditions, which are required to be complied by us. Any default by our Company in complying with the same may result in inter-alia the cancellation of such licenses, consents, authorizations and/or registrations, which may adversely affect our operations. There can be no assurance that the relevant authorities will issue or renew any of such permits or approvals in time or at all. While we have had no such instances in the past, where any of the statutory authority has either temporarily or permanently suspended any registration/ license of any of our business operations. We shall attempt to comply in spirit and in law with all the applicable laws. Failure to renew, maintain or obtain the required permits or approvals in time may result in the interruption of our operations and may have a material adverse effect on our business.

***26) The Intellectual Property Rights used by us are registered in the name of our company and subsidiary, respectively. However, any infringement of third-party intellectual property rights or failure to protect our intellectual property rights may adversely affect our business.***

Our Company owns one intellectual property right (IPR) i.e., the trademark "Amtech" which is registered in the name of our Company, and our subsidiary owns the trademark "Croda" which is registered in its name. However, Infringement of third-party intellectual property rights or failure to protect our own intellectual property can have negative consequences. In addition, infringement claims can damage our reputation and discourage potential investors, partners, or customers. Additionally, if we fail to protect our own intellectual property, our competitors or other third parties may copy, steal, or misuse our ideas, products, or services. This can lead to lost revenues, decreased market share, or erosion of our competitive advantage. Moreover, any unauthorized use, reproduction, or distribution of our copyrighted material without our permission will result in legal action and may lead to financial penalties or damage to our brand reputation. It is essential for us to protect our copyrighted material and ensure that it is used only with our permission, to avoid any negative impact on our business operations. Defending our

intellectual property rights can be expensive and time-consuming, and we may not be able to prevent others from infringing or challenging our rights.

***27) We are dependent on third party transportation providers for delivery of raw materials to our company from our suppliers and delivery of our finished products to our customers. We have not entered into any formal contracts with our transport providers and any failure on part of such service providers to meet their obligations could adversely affect our business, financial condition and results of operation.***

To ensure smooth functioning of our manufacturing operations, we need to maintain continuous supply and transportation of the raw materials required from the supplier to our manufacturing unit and transportation of our finished products from our unit to our customers, which may be subject to various uncertainties and risks. We are significantly dependent on third party transportation providers for the delivery of raw materials to our company and delivery of our finished products to our customers. Uncertainties and risks such as transportation strikes or delay in supply of raw materials and products could have an adverse effect on our supplies and deliveries to and from our customers and suppliers. Additionally, raw materials and products may be lost or damaged in transit for various reasons including occurrence of accidents or natural disasters. While, the aforementioned events have not occurred in the past, occurrence of instances of failure to maintain a continuous supply of raw materials or to deliver our products to our distribution intermediaries in a timely, efficient and reliable manner could adversely affect our business, results of operations and financial condition. Further, we have not entered into any long-term agreements with our transporters for any of our manufacturing unit and the costs of transportation are generally based on mutual terms and the prevailing market price. In the absence of such agreements, we cannot assure that the transport agencies would fulfil their obligations or would not commit a breach of the understanding with our company. In the event that the finished goods or raw materials suffer damage or are lost during transit, we may not be able to prosecute the agencies due to lack of formal agreements. Further, the transport agencies are not contractually bound to deal with us exclusively, we may face the risk of our competitors offering better terms or prices, which may cause them to cater to our competitors alongside us or on a priority basis, which could adversely affect our business, results of operations and financial condition. While, the aforementioned events have not occurred for the period ended November 30, 2025, and Fiscal Year March 31, 2025, March 31, 2024, and March 31, 2023, however, occurrence of any such events may have an adverse impact on our business, results of operations and financial condition. Any inefficiencies or disruptions in our distribution network such as delays, lack of infrastructure, inadequate inventory management, or poor coordination with logistics partners could lead to supply chain bottlenecks, stock-outs, or excess inventory. This may result in lost sales opportunities, dissatisfied customers, and reduced market competitiveness. If we fail to adapt our distribution infrastructure or optimize logistics and supply chain systems, our ability to meet growing customer demand could be compromised. Moreover, ineffective distribution management may increase operational costs and negatively impact our margins, thereby affecting both our short-term performance and long-term growth prospects. While we have not encountered such a situation in the past, there can be no assurance that it will not arise in the future.

***28) We are subject to certain covenants under our financing and novation agreements and in case of any breach of covenants in the future, such non-compliance, if not waived, could adversely affect our business, results of operations and financial condition.***

The Company has obtained a loan from Yes Bank and in connection with the loan, we have received a No Objection Certificate (NOC) from the lender for IPO. The terms of our outstanding debt require us to comply with various covenants and conditions. However, we cannot assure you that there will not be any instances of delays in repayment of borrowings or interest thereon in the future.

Such delays in repayment of borrowing or breaches of covenants may constitute events of default under the relevant facility agreements, which permit the lenders under each of the relevant facility agreements to terminate the facility agreement and declare the entire outstanding amounts under these loans due and payable, suspend further access to the debt facility by our Company, and in certain instances, declare the security created to be enforceable. Further, such events of default could also result in cross-defaults under certain other facility agreements, resulting in the outstanding amounts under such other facility agreements becoming capable of being declared due and payable immediately.

There is no assurance that we will be in compliance with such financial covenants in the future or there will be no delays in repayment of outstanding facility amounts.

- We will succeed in obtaining consents or waivers from its lenders;
- Our lenders will not declare amounts to be immediately due and repayable; or
- Our lenders will not impose additional operating and financial restrictions on us, or otherwise seek to modify the terms of the existing financing arrangements in ways that are materially averse to us.

Any instances of event of defaults or cross-default under facility agreements in the future, may have an adverse impact on cash flows, financial condition, business, and operations of our Company. For more information regarding our indebtedness, see “Financial Indebtedness” on page 206.

***29) Orders placed by customers may be delayed, modified or cancelled, which may have an adverse effect on our business, financial condition and results of operations.***

We may encounter problems in executing the orders in relation to our products or executing them on a timely basis. Moreover, factors beyond our control or the control of our customers may postpone the delivery of such orders or cause their cancellation. Due to the possibility of cancellations or changes in specifications and schedule of delivery of such orders, resulting from our customers discretion or problems we encounter in the delivery of such products or reasons outside our control or the control of our customers, we cannot predict with certainty when, if or to what extent we may be able to deliver the orders placed. Additionally, delays in the delivery of such orders can lead to customers delaying or refusing to pay the amount, in part or full, that we expect to be paid in respect of such products. In addition, even where a delivery proceeds, as scheduled, it is possible that the customers may default or otherwise fail to pay amounts owed.

***30) Failure or disruption of our information technology systems may adversely affect our business, financial condition, results of operations, cash flows and prospects.***

We depend on information technology systems and accounting systems to support our business processes, including quality control, product costing, human resources and finance. Although these technology initiatives are intended to increase productivity and operating efficiencies, they may not achieve such intended results. These systems may be potentially vulnerable to outages due to fire, floods, power loss, telecommunications failures, natural disasters, computer viruses or malware, break-ins and similar events. Effective response to such disruptions or malfunctions will require effort and diligence on the part of our third-party distribution partners and employees to avoid any adverse effect to our information technology systems.

Any failure in overhauling or updating our information technology systems in a timely manner could cause our operations to be vulnerable to external attacks and inefficient. While we have not experienced any technology failure, outages, malware or virus attack or any other similar events in last three financial years. Any failure or disruption in the operation of these systems or the loss of data due to such failure or disruption (including due to human error or sabotage) may affect our ability to conduct our normal business operations, which may materially adversely affect our business, financial condition, results of operations, cash flows and prospects.

In addition, technological advances from time to time may result in our systems, methods or processing facilities becoming obsolete. There is no assurance that we will not experience disruption in our information technology systems in the future and we will be able to remedy such disruption in timely manner, or at all. Any such disruption of our information technology systems could have a material adverse effect on our business, results of operation and financial condition.

***31) Our business is capital intensive and may require additional financing to meet those requirements, which could have an adverse effect on our results of operations, cash flows and financial conditions.***

The specialty chemicals industry is a capital-intensive industry, and our growth strategy may require us to raise additional funds or refinance our existing debt. We cannot assure you that such funds will be available to us on favourable terms, or at all. The amount and timing of such additional financing needs will vary depending on the timing of the launch of our new manufacturing facilities, potential acquisitions of new businesses, renovation and refurbishment costs for new and existing manufacturing facilities and the amount of cash flow from our operations. Further, any incurrence of additional debt may increase our financing costs. Our ability to obtain additional capital on acceptable terms is subject to several uncertainties, including:

- investors “or lenders” perception of, and demand for our products;
- conditions of the Indian and other capital markets in which we seek to raise funds;
- our future results of operations, financial condition and cash flows;
- governmental regulation of foreign investment in the chemical industry;
- economic, political and other conditions in India; and
- governmental policies concerning external commercial borrowings.

Further, we are also required to incur expenses in relation to repairs and maintenance of our manufacturing facilities and plant and equipment. Set out below are details of such repairs and maintenance expenses incurred for the period ended November 30, 2025, and in the Financial Years 2025, 2024 and 2023:

(₹ in lakhs)

Particulars	For period ended		For Fiscal Year					
	November 30, 2025		March 31, 2025		March 31, 2024		March 31, 2023	
	Amount	% of total expense	Amount	% of total expense	Amount	% of total expense	Amount	% of total expense
<b>Repairs and Maintenance</b>	43.62	1.96%	29.38	0.92%	49.44	2.07%	5.40	0.25%

The actual amount and timing of our future capital requirements may differ from estimates as a result of, among other factors, unforeseen delays or cost overruns, unanticipated expenses, regulatory changes, delay in obtaining regulatory approvals, economic conditions, design changes, weather related delays, technological changes and additional market developments. Our sources of additional financing, where required to meet our capital expenditure plans, may include the incurrence of debt or the issue of equity or debt securities or a combination of both. If we decide to raise funds through the incurrence of debt, our interest and debt repayment obligations will increase, and could have a significant effect on our profitability and cash flows and we may be subject to additional covenants, which could limit our ability to access cash flows from operations. Any issuance of equity, on the other hand, would result in a dilution of shareholding. For details in relation to the terms of our existing financing arrangements, see “Financial Indebtedness” on page 206 of this Draft Red Herring Prospectus.

**32) Any employee misconduct or errors that are difficult to detect and any such incidences could adversely affect our financial condition, results of operations and reputation.**

Employee misconduct or errors could expose us to business risks or losses, including regulatory sanctions and cause serious harm to our reputation and goodwill of our Company. Further, fraud or other misconduct by our employees, such as unauthorized business transactions, leaking of confidential information especially in relation to products under development, and breach of any applicable law or our internal policies and procedures, may be difficult to detect or prevent. There can be no assurance that we will be able to detect or deter such misconduct. Moreover, the precautions we take to prevent and detect such activity may not be effective in all cases. Our employees and agents may also commit errors that could subject us to claims and proceedings for alleged negligence, as well as regulatory actions on account of which our business, financial condition, results of operations and goodwill could be adversely affected. Although, in the past, we have not encountered instances of any employee’s misconduct, fraudulent conduct and/or breach of our Company’s code of conduct, we cannot assure you that fraud or other misconduct will not occur in the future.

**33) Our insurance policies may not be adequate to cover all losses incurred in our business. An inability to maintain adequate insurance cover to protect us from material adverse incidents in connection with our business may adversely affect our operations and profitability.**

We have obtained Burglary and fire Insurance from ICICI Lombard covering our factory building, furniture fixtures & fittings and finished goods that we believe are customary in our industry. Our insurance coverage may not adequately protect us against all material hazards as the policies may not be sufficient to cover all our economic losses. Further, there can be no assurance that any claim under the insurance policies maintained by us will be honoured fully, in part or on time. Our inability to maintain adequate insurance cover in connection with our business or honour the contractual obligations could cause reputational

damage and adversely affect our operations. In addition, our insurance policies are subject to annual review, and we cannot assure you that we will be able to renew these policies on similar or otherwise acceptable terms, or at all. As of November 30, 2025, our insurance cover was ₹385.00 Lakhs and our insurance cover as a percentage of property plant and equipment and inventories (based on Restated Consolidated Financial Statements for the period ended November 30, 2025) was 32.90%. To the extent that we suffer loss as a result of events for which we are not insured, or for which we did not obtain or maintain insurance, or which is not covered by insurance, exceeds our insurance coverage or where our insurance claims are rejected, the loss would have to be borne by us and our results of operations, financial performance and cash flows could be adversely affected.

**34) *The average cost of acquisition of Equity shares by our Promoters may be lower than the Issue price.***

Our promoters' average cost of acquisition of equity shares in our Company may be lower than the Issue Price. The details of the average cost of acquisition of Equity Shares held by our Promoter as at the date of the Draft Red Herring Prospectus is set out below:

S. No.	Name of the Promoters	No. of Equity Shares held	Average Cost of Acquisition per equity share (in ₹) *
1)	Ajit Singh Bawa	18,27,664	Nil
2)	Meenakshi Sharma	11,51,816	29.88
3)	Gurpreet Kaur Bawa	2,23,296	Nil

*\*As certified by M/s Kansal Yogesh & Co., Chartered Accountants, by way of their certificate dated May 29, 2026.*

**35) *Changing regulations in India could lead to new compliance requirements that are uncertain. The regulatory environment in which we operate is evolving and is subject to change.***

The Government of India may implement new laws or other regulations that could affect the manufacturing industry or the sectors we serve, which could lead to new compliance requirements. New compliance requirements could increase our costs or otherwise adversely affect our business, financial condition and results of operations. Further, the manner in which new requirements will be enforced or interpreted can lead to uncertainty in our operations and could adversely affect our operations. Our business and financial performance could be adversely affected by any unexpected or onerous requirements or regulations resulting from any changes in laws or interpretation of existing laws, or the promulgation of new laws, rules and regulations. Any such changes and the related uncertainties with respect to the implementation or change in the legal framework may have a material adverse effect on our business, financial condition and results of operations.

**36) *Our funding requirements and proposed deployment of the Net Proceeds have not been appraised by a credit rating agency registered with the Board and if there are any delays or cost overruns, we may have to incur additional cost to fund the objects of the Issue because of which our business, financial condition and results of operations may be adversely affected.***

We intend to use the Net Proceeds for the purposes described in chapter titled "Objects of the Issue" on page 80 of this Draft Red Herring Prospectus. All the funding requirements mentioned as a part of the objects of the Issue have not been appraised by any credit rating agency registered with the Board. The deployment of the funds as stated under chapter "Objects of the Issue" is at the discretion of our Board of Directors and is not subject to monitoring by any external independent credit rating agency. As per SEBI (ICDR) Regulations, 2018, appointment of monitoring agency is required only for Issue size above ₹ 5,000.00 lakhs. Hence, we are not required to appoint a monitoring agency to monitor the utilization of Issue proceeds before filing of Red Herring Prospectus. However, the Audit Committee of our Board will monitor the utilization of Issue proceeds. Further, our Company shall inform about material deviations in the utilization of Issue proceeds to the stock exchange and shall also simultaneously make the material deviations / adverse comments of the audit committee public.

**37) *In addition to normal remuneration or benefits and reimbursement of expenses, some of our directors and key managerial personnel are interested in our Company to the extent of their shareholding and dividend entitlement in our Company.***

Some of our Directors and KMPs are interested in our Company to the extent of their shareholding and dividend entitlement in our Company, in addition to normal remuneration or benefits and reimbursement of expenses. As a result, our directors will continue to exercise significant control over our Company, including being able to control the composition of our board of directors and determine decisions requiring simple or special majority voting, and our other Shareholders may be unable to affect the outcome of such voting. We cannot assure you that our directors or our Key Management Personnel would always exercise their rights as shareholders to the benefit and best interest of our Company, thereby adversely affecting our business and results of operations and prospects.

For further details on the shareholding of our Directors and Key Managerial Personnel of our Company, please refer to the Chapter titled “Our Management” beginning on page 161 of this Draft Red Herring Prospectus.

- 38) *The Objects of the Offer for which funds are being raised have not been appraised by any bank or financial institution. The deployment of funds is entirely at the discretion of our management and as per the details mentioned in the section titled “Objects of the Offer”. Any revision in the estimates may require us to reschedule our expenditure and may have a bearing on our expected revenues and earnings.***

We propose to utilize the Net Proceeds for purposes identified in the section titled “Objects of the Offer” beginning on page 80 of this Draft Red Herring Prospectus. Our funding requirements and the deployment of the proceeds of the Offer are purely based on our management’s estimates and have not been appraised by any bank or financial institution. Our Company may have to revise such estimates from time to time on account of various factors such as our financial and market condition, business strategy, competition, negotiation with suppliers, variation in cost estimates on account of factors, including changes in design or configuration of the equipment and other external factors including changes in the price of the equipment due to variation in commodity prices which may not be within the control of our management. Our estimates may exceed the value and may require us to reschedule our expenditure which may have a bearing on our expected revenues and earnings. Further, the deployment of the funds towards the Objects of the Offer is entirely at the discretion of our management and our Board, subject to compliance with the necessary provisions of the SEBI ICDR and Companies Act. However, the Board and Audit Committee will monitor the utilization of the Net Proceeds and ensure the same is disclosed under separate head in our balance sheet along with relevant details for all sum amounts that have not been utilized. Our Company will issue a disclosure to the Stock Exchanges, on a quarterly basis, deviations, if any, in the Use of Proceeds of the Offer from the Objects stated in the Draft Prospectus or by way of an explanatory statement to the notice for a general meeting.

- 39) *Our success largely depends on our Promoter and Management and our ability to attract and retain them. Any loss of our director and key managerial personnel could adversely affect our business, operations and financial condition.***

We benefit from our relationship with our promoters, and management and our success depends upon the continuing services and experience of our promoters and management who have been responsible for the growth of our business and is closely involved in the overall strategy, direction and management of our business. Ajit Singh Bawa has 24 years of experience in the industry, Gurpreet Kaur Bawa has 15 years of experience in the industry, and Meenakshi Sharma has 8 years of experience, which turn out to be beneficial for our Company. Their extensive knowledge and established relationships with stakeholders have played a key role to our achievements. Accordingly, our performance is heavily dependent upon the services of our promoters and management. If our promoters and management are unable or unwilling to continue in their current role, finding suitable replacements may prove challenging. The loss of our Promoters and/or management could have serious consequences for our business. It could hinder our ability to execute our strategic plans and negatively impact our financial condition, operational results, and future prospects. If they leave, it could also disrupt the important relationships they’ve developed over the years, making it even harder for us to keep and expand our business.

Further, any inability to retain our management team, key managerial personnel and senior management may have an adverse effect on our operations. We might face challenges in recruiting suitably skilled personnel, particularly as we continue to grow and diversify our operations. In the future, we may also not be able to compete with other larger companies for suitably skilled personnel due to their ability to offer more competitive compensation and benefits. The loss of any of the members of our senior management team, our directors or other key personnel or an inability on our part to manage the attrition levels may materially and adversely impact our business, results of operations, financial condition and growth prospects.

For further details on the Management of our Company please refer to the chapter titled “Our Management” beginning on page 161 of this Draft Red Herring Prospectus.

**40) *Our continued success is dependent upon our ability to hire, retain and utilize qualified personnel.***

The success of our business is dependent upon our ability to hire, retain, and utilize qualified personnel, including project managers, engineers, and corporate management professionals who have the required experience and expertise. From time to time, it may be difficult to attract and retain qualified individuals with the expertise and in the timeframe demanded by our clients, and we may not be able to satisfy the demand for our services because of our inability to successfully hire and retain qualified personnel.

If we cannot attract and retain qualified personnel or effectively implement appropriate succession plans, it could have a material adverse impact on our business, financial condition, and results of operations. Moreover, we may be unable to manage knowledge developed internally, which may be lost in the event of our inability to retain employees. The cost of providing our services, including the extent to which we utilize our workforce, affects our profitability.

**41) *Industry information included in this Draft Red Herring Prospectus has been derived from independent reports and information available on various third-party websites. As such, we cannot guarantee the accuracy or completeness of facts and other statistics with respect to the industry information contained in this Draft Red Herring Prospectus and reliability on the same could adversely impact our operations.***

The facts and other statistics in this Draft Red Herring Prospectus relating to the Global economy, Indian economy and our industry have been derived from the various websites and research documents published by Government and other independent research entities. While we believe the information to be relevant, we cannot guarantee the quality or reliability of such materials. While we have taken reasonable care in the reproduction of such information, industry facts and other statistics, they have not been prepared or independently verified by us or any of our respective affiliates or advisors and, therefore, we cannot make any representation as to their accuracy or completeness. These facts and other statistics include the facts and statistics included in the chapter titled “Industry Overview” beginning on page 107 of this Draft Red Herring Prospectus. Due to possibly flawed or ineffective data collection methods or discrepancies between published information and market practice and other problems, the statistics herein may be inaccurate or may not be comparable to statistics produced elsewhere and should not be unduly relied upon. Further, there is no assurance that they are stated or compiled on the same basis or with the same degree of accuracy, as the case may be, elsewhere. As such, reliance on the information provided in the Industry Overview chapter for making investment decisions carries inherent risks. Investors should exercise caution and not base their investment decisions solely on this data, as it may not accurately reflect the current market conditions or future performance of our Company.

**42) *We have not made any alternate arrangements for meeting our capital requirements for the Objects of the Offer. Further we have not identified any alternate source of financing the “Objects of the Offer”. Any shortfall in raising / meeting the same could adversely affect our growth plans, operations and financial performance.***

As on date, we have not made any alternate arrangements for meeting our capital requirements for the objects of the Offer. We meet our capital requirements through our bank finance, debts, owned funds and internal accruals. Any shortfall in our net owned funds, internal accruals and our inability to raise debt in future would result in us being unable to meet our capital requirements, which in turn will negatively affect our financial condition and results of operations. Further we have not identified any alternate source of funding and hence any failure or delay on our part to raise money from this Offer or any shortfall in the Offer proceeds may delay the implementation schedule and could adversely affect our growth plans.

For further details, please refer to the chapter titled “Objects of The Offer” beginning on page 80 of this Draft Prospectus.

**RISKS RELATED TO OUR EQUITY SHARES AND EQUITY SHAREHOLDERS:**

**43) *Our Promoters, together with our Promoter Group, will continue to retain majority shareholding in our Company after the proposed Initial Public Offer, which will allow them to exercise significant control over us. We cannot assure you that our Promoters and Promoter Group members will always act in the best interests of the Company.***

After the completion of our Initial Public Offer, our Promoters, along with our Promoter Group members, will hold, approximately [●] of our post – Issue paid up equity capital of our Company. As a result, our Promoters will continue to exercise significant control over us, including being able to control the composition of our Board and determine matters requiring shareholder approval or approval of our Board. Our Promoters may conflict with our interests or the interests of our minority shareholder by exercising their control, our Promoters could delay, defer or cause a change of our control or a change in our capital structure, delay, defer or cause a merger, consolidation, takeover or other business combination involving us, discourage or encourage a potential acquirer from making a tender offer or otherwise attempting to obtain control of our Company. We cannot assure you that our Promoters and Promoter Group members will always act in our Company’s or your best interests. For further details, please refer to the chapters titled “Capital Structure” and “Our Promoter, Promoter Group and Group Companies”, beginning on page 62 and 178 respectively, of this Draft Red Herring Prospectus.

***44) Our ability to pay dividends in the future will depend upon our future earnings, financial condition, cash flows, working capital requirements, capital expenditure and restrictive covenants in our financing arrangements.***

We may retain all our future earnings, if any, for use in the operations and expansion of our business. As a result, we may not declare dividends in the foreseeable future. Any future determination as to the declaration and payment of dividends will be at the discretion of our Board of Directors and will depend on factors that our Board of Directors deem relevant, including among others, our results of operations, financial condition, cash requirements, business prospects and any other financing arrangements. Accordingly, realization of a gain on shareholders investments may largely depend upon the appreciation of the price of our Equity Shares. There can be no assurance that our Equity Shares will appreciate in value. For details of our dividend history, see “Dividend Policy” on page 189 of this Draft Red Herring Prospectus.

***45) Any future issuance of Equity Shares may dilute the shareholding of individual investors, and sales of the Equity Shares by our major shareholders may adversely affect the trading price of our Equity Shares.***

Any future equity issuances by our Company may lead to the dilution of investors’ shareholdings in our Company. In addition, any sale of substantial Equity Shares in the public market after the completion of this Offer, including by our major shareholders, or the perception that such sales could occur, could adversely affect the market price of the Equity Shares and could significantly impair our future ability to raise capital through offerings of the Equity Shares. We cannot predict what effect, if any, market sales of the Equity Shares held by the major shareholders of our Company or the availability of these Equity Shares for future sale will have on the market price of our Equity Shares.

***46) The price of our Equity Shares may be volatile, and an active trading market for our Equity Shares may not develop following the listing of our Equity Shares on the Stock Exchanges.***

Prior to this Offer, there has been no public market for our Equity Shares. [●] is acting as Market Maker for the Equity Shares of our Company. However, the trading price of our Equity Shares may fluctuate after this Offer due to a variety of factors, including as a result of our results of operations and the performance of our business, competitive conditions, general economic, political and social factors, the performance of the Indian and global economy and significant developments in India’s fiscal regime, volatility in the Indian and global securities market, performance of our competitors, , changes in the estimates of our performance or recommendations by financial analysts and announcements by us or others regarding contracts, acquisitions, strategic partnerships, joint ventures, or capital commitments. In addition, if the stock markets experience a loss of investor confidence, the trading price of our Equity Shares could decline for reasons unrelated to our business, financial condition or operating results. The trading price of our Equity Shares might also decline in reaction to events that affect other companies in our industry even if these events do not directly affect us. Each of these factors, among others, could materially affect the price of our Equity Shares. There can be no assurance that an active trading market for our Equity Shares will develop or be sustained after this Offer, or that the price at which our Equity Shares are initially offered will correspond to the prices at which they will trade in the market subsequent to this Offer. For further details of the obligations and limitations of Market Makers, please refer to the section titled “General Information – Details of the Market Making Arrangement for this Offer” on page 55 of this Draft Red Herring Prospectus.

**EXTERNAL RISK FACTORS:**

***47) Changes in the taxes and other levies imposed by the Government of India or other State Governments, as well as other financial policies and regulations, may have a material adverse effect on our business, financial condition and results of operations.***

Taxes and other levies imposed by the Central or State Governments in India that affect our industry include:

- Custom duties on imports of raw materials and components;
- Goods and Service Tax

Any change in Indian tax laws could have an effect on our operations. The Government of India has implemented two major reforms in Indian tax laws, namely the Goods and Services Tax (“GST”), and provisions relating to general anti-avoidance rules (“GAAR”). The GST regime continues to be subject to amendments and its interpretation by the relevant regulatory authorities is constantly evolving. GAAR became effective from April 01, 2017. The tax consequences of the GAAR provisions being applied to an arrangement may result in, among others, a denial of tax benefit to us and our business. In the absence of any substantial precedents on the subject, the application of these provisions is subjective. If the GAAR provisions are made applicable to us, it may have an adverse tax impact on us. Further, if the tax costs associated with certain of our transactions are greater than anticipated because of a particular tax risk materializing on account of new tax regulations and policies, it could affect our profitability from such transactions.

We cannot predict whether any new tax laws or regulations impacting our services will be enacted, what the nature and impact of the specific terms of any such laws or regulations will be or whether if at all, any laws or regulations would have an adverse effect on our business. Further, any adverse order passed by the appellate authorities/ tribunals/ courts would have an effect on our profitability.

***48) Significant differences exist between Indian GAAP and other accounting principles, such as US GAAP and IFRS, which may be material to investors’ assessments of our Company’s financial condition. Our failure to successfully adopt IFRS may have an adverse effect on the price of our Equity Shares. The proposed adoption of IFRS could result in our financial condition and results of operations appearing materially different than under Ind AS.***

Our financial statements, including the Restated Consolidated Financial Statements provided in this Draft Red Herring Prospectus, are prepared in accordance with Indian GAAP. We have not attempted to quantify the impact of IFRS or U.S. GAAP on the financial data included in this Draft Red Herring Prospectus, nor do we provide a reconciliation of our financial statements to those of U.S. GAAP or IFRS. U.S. GAAP and IFRS differ in significant respects from Ind GAAP. For details, see “Presentation of Financial, Industry and Market Data” on page 14 of this Draft Red Herring Prospectus.

Accordingly, the degree to which the Indian GAAP financial statements included in this Draft Red Herring Prospectus will provide meaningful information is entirely dependent on the reader's level of familiarity with Indian accounting practices. Any reliance by persons not familiar with Indian accounting practices on the financial disclosures presented in this Draft Prospectus should accordingly be limited.

India has decided to adopt the “Convergence of its existing standards with IFRS” and not the “International Financial Reporting Standards” (“IFRS”), which was announced by the MCA, through the press note dated January 22, 2010. These “IFRS based / synchronized Accounting Standards” are referred to in India as Ind AS. Public companies in India, including our Company, may be required to prepare annual and interim financial statements under Ind AS. The MCA, through a press release dated February 25, 2011, announced that it will implement the converged accounting standards in a phased manner after various issues, including tax related issues, are resolved. Further, MCA Notification dated February 16, 2015, has provided an exemption to the Companies proposing to list their shares on the SME Exchange as per Chapter IX of the SEBI ICDR Regulations and hence the adoption of Ind AS by a SME exchange listed company is voluntary. Accordingly, we have made no attempt to quantify or identify the impact of the differences between Ind AS and IFRS or to quantify the impact of the difference between Ind AS and IFRS as applied to its financial statements. There can be no assurance that the adoption of Ind AS will not affect our reported results of operations or financial condition. Any failure to successfully adopt Ind AS may have an adverse effect on the trading price of our Equity Shares. Currently, it is not possible to quantify whether our financial results

will vary significantly due to the convergence to Ind AS, given that the accounting principles laid down in the Ind AS are to be applied to transactions and balances carried in books of accounts as on the date of the applicability of the converged standards (i.e., Ind AS) and for future periods.

Moreover, if we volunteer for transition to Ind AS reporting, the same may be hampered by increasing competition and increased costs for the relatively small number of Ind AS experienced accounting personnel available as more Indian companies begin to prepare Ind AS financial statements. Any of these factors relating to the use of converged Indian Accounting Standards may adversely affect our financial condition.

**49) *Instability in financial markets could materially and adversely affect our results of operations and financial condition.***

The Indian economy and financial markets are significantly influenced by worldwide economic, financial and market conditions. Any financial turmoil, especially in the United States of America or Europe, may have a negative impact on the Indian economy. Although economic conditions differ in each country, investors' reactions to any significant developments in one country can have adverse effects on the financial and market conditions in other countries. A loss in investor confidence in the financial systems, particularly in other emerging markets, may cause increased volatility in Indian financial markets.

The global financial turmoil, an outcome of the sub – prime mortgage crisis which originated in the United States of America, led to a loss of investor confidence in worldwide financial markets. Indian financial markets have also experienced the contagion effect of the global financial turmoil, evident from the sharp decline in SENSEX, BSE's benchmark index. Any prolonged financial crisis may have an adverse impact on the Indian economy and us, thereby resulting in a material and adverse effect on our business, operations, financial condition, profitability and price of our Equity Shares.

**50) *Conditions in the Indian securities market and stock exchanges may affect the price and liquidity of our Equity Shares.***

Indian stock exchanges, which are smaller and more volatile than stock markets in developed economies, have in the past, experienced problems which have affected the prices and liquidity of listed securities of Indian companies. These problems include temporary exchange closures to manage extreme market volatility, broker defaults, settlement delays and strikes by brokers. In addition, the governing bodies of the Indian stock exchanges have from time – to – time restricted securities from trading, limited price movements and restricted margin requirements. Further, disputes have occurred on occasion between listed companies and the Indian stock exchanges and other regulatory bodies that, in some cases, have had a negative effect on market sentiment. If similar problems occur in the future, the market price and liquidity of the Equity Shares could be adversely affected. Further, a closure of, or trading stoppage on, either of the Stock Exchanges could adversely affect the trading price of our Equity Shares.

**51) *Global economic, political and social conditions may harm our ability to do business, increase our costs and negatively affect our stock price.***

Global economic and political factors that are beyond our control, influence forecasts and directly affect performance. These factors include interest rates, rates of economic growth, fiscal and monetary policies of governments, inflation, deflation, foreign exchange fluctuations, consumer credit availability, fluctuations in commodities markets, consumer debt levels, unemployment trends and other matters that influence consumer confidence, spending and tourism. Increasing volatility in financial markets may cause these factors to change with a greater degree of frequency and magnitude, which may negatively affect our stock prices.

**52) *Foreign investors are subject to foreign investment restrictions under Indian law that limits our ability to attract foreign investors, which may adversely impact the market price of the Equity Shares.***

Under the foreign exchange regulations currently in force in India, transfer of shares between non – residents and residents are freely permitted (subject to certain exceptions) if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or fall under any of the exceptions referred to above, then the prior approval of the RBI will be required. Additionally, shareholders who seek to convert the Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India will require a no objection/ tax clearance certificate from the income tax authority.

There can be no assurance that any approval required from the RBI or any other government agency can be obtained on any particular terms or at all.

**53) Pursuant to listing of the Equity Shares, we may be subject to pre-emptive surveillance measures like Additional Surveillance Measure (“ASM”) and Graded Surveillance Measures (“GSM”) by the Stock Exchanges in order to enhance market integrity and safeguard the interest of investors.**

SEBI and the Stock Exchanges have introduced various pre-emptive surveillance measures in order to enhance market integrity and safeguard the interests of investors, including ASM and GSM. ASM and GSM are imposed on securities of companies based on various objective criteria such as significant variations in price and volume, enhance the integrity of the market and safeguard the interest of the investors, concentration of certain client accounts as a percentage of combined trading volume, average delivery, securities which witness abnormal price rise not commensurate with financial health and fundamentals such as earnings, book value, fixed assets, net worth, price / earnings multiple, market capitalization, etc. Upon listing, the trading of our Equity Shares would be subject to differing market conditions as well as other factors which may result in high volatility in price, low trading volumes, and a large concentration of client accounts as a percentage of combined trading volume of our Equity Shares. The occurrence of any of the abovementioned factors or other circumstances may trigger any of the parameters prescribed by SEBI and the Stock Exchanges for placing our securities under the GSM and/or ASM framework or any other surveillance measures, which could result in significant restrictions on trading of our Equity Shares being imposed by SEBI and the Stock Exchanges. These restrictions may include requiring higher margin requirements, requirement of settlement on a trade for trade basis without netting off, limiting trading frequency, reduction of applicable price band, requirement of settlement on gross basis or freezing of price on upper side of trading, as well as mentioning of our Equity Shares on the surveillance dashboards of the Stock Exchanges. In the event our Equity Shares are subject to such surveillance measures implemented by the Stock Exchanges, we may be subject to certain additional restrictions in connection with trading of our Equity Shares such as limiting trading frequency (for example, trading either allowed once in a week or a month) or freezing of price on upper side of trading which may have an adverse effect on the market price of our Equity Shares or may in general cause disruptions in the development of an active trading market for our Equity Shares. The imposition of these restrictions and curbs on trading may have an adverse effect on market price, trading and liquidity of our Equity Shares and on the reputation and conditions of our Company.

**54) Under Indian law, foreign investors are subject to investment restrictions that limit our ability to attract foreign investors, which may adversely affect the trading price of the Equity Shares.**

Under foreign exchange regulations currently in force in India, the transfer of shares between non-residents and residents are freely permitted (subject to compliance with sectoral norms and certain other restrictions), if they comply with the pricing guidelines and reporting requirements specified by the RBI. If the transfer of shares, which are sought to be transferred, is not in compliance with such pricing guidelines or reporting requirements or falls under any of the exceptions referred to above, then a prior regulatory approval will be required. Further, unless specifically restricted, foreign investment is freely permitted in all sectors of the Indian economy up to any extent and without any prior approvals, but the foreign investor is required to follow certain prescribed procedures for making such investment. The RBI and the concerned ministries and/or departments are responsible for granting approval for foreign investment. Additionally, shareholders who seek to convert Rupee proceeds from a sale of shares in India into foreign currency and repatriate that foreign currency from India require a no-objection or a tax clearance certificate from the Indian income tax authorities. Furthermore, this conversion is subject to the shares having been held on a repatriation basis and, either the security having been sold in compliance with the pricing guidelines or, the relevant regulatory approval having been obtained for the sale of shares and corresponding remittance of the sale proceeds.

In addition, pursuant to the Press Note No. 3 (2020 Series), dated April 17 2020, issued by the DPIIT, investments where the beneficial owner of the equity shares is situated in or is a citizen of a country which shares a land border with India, can only be made through the Government approval route. Further, in the event of transfer of ownership of any existing or future foreign direct investment in an entity in India, directly or indirectly, resulting in the beneficial ownership falling within the aforesaid restriction and/or purview, such subsequent change in the beneficial ownership will also require approval of the Government of India. Furthermore, on April 22, 2020, the Ministry of Finance, Government of India has also made similar amendment to the FEMA Non-debt Instruments Rules. We cannot assure investors that any required approval from the RBI or any other government agency can be obtained on any particular terms or conditions or at all. For further information, see “*Restriction on Foreign Ownership of Indian Securities*” on page 279.

**55) *Any downgrading of India's sovereign rating by an independent agency may harm our ability to raise financing.***

Any adverse revisions to India's credit ratings for domestic and international debt by international rating agencies may adversely impact our ability to raise additional financing, and the interest rates and other commercial terms at which such additional financing may be available. This could have an adverse effect on our business and future financial performance, our ability to obtain financing for capital expenditures and the trading price of our Equity Shares.

**56) *Natural disasters, fires, epidemics, pandemics, acts of war, terrorist attacks, civil unrest and other events could materially and adversely affect our business.***

Natural disasters (such as typhoons, flooding and earthquakes), epidemics, pandemics such as COVID – 19, acts of war, terrorist attacks and other events, many of which are beyond our control, may lead to economic instability, including in India, or globally, which may in turn materially and adversely affect our business, financial condition and results of operations. Our operations may be adversely affected by fires, natural disasters and/or severe weather, which can result in damage to our property or inventory and generally reduce our productivity and may require us to evacuate personnel and suspend operations.

The projected working capital requirement is supported by the expected level of manufacturing operations of the subsidiary. As per the installed capacity and capacity utilisation certificate issued by M/s, Mech India, the installed capacity increased from 238.20 MTPA in FY 2024 to 358.20 MTPA in FY 2025 and 382.20 MTPA for the period ended November 30, 2025. In view of the increase in installed capacity, production level and capacity utilisation, the subsidiary is required to maintain adequate inventory of inventory for smooth manufacturing operations and timely execution of customer orders. Accordingly, the increase in inventory, operational advances and other working capital items has been considered as part of the projected working capital requirement.

Further, the subsidiary has proposed to deploy funds towards purchase of additional plant and machinery as part of the objects of the issue. The proposed machinery is expected to support the manufacturing operations of The Company and improve its

production capability. The impact of the proposed machinery is expected to reflect mainly from the last quarter of the current financial year, subject to installation and commissioning.

Further, the increase in scale of operations may also result in higher trade receivables, operational advances and other current assets in the normal course of business. Accordingly, the projected working capital requirement has been estimated after considering the expected increase in manufacturing operations, capacity utilisation and business volume of The Company.

**The holding period assumptions used for the working capital requirement are set forth below:**

The movement in trade receivables and receivable days is mainly based on the credit period allowed to customers, billing cycle, timing of collections and the overall level of sales during the respective period.</p> <p>The subsidiary generally allows credit to its customers in the ordinary course of business. Since the operations of Croda Pigment Private Limited are expected to increase, the level of</p>

The increase is mainly on account of higher level of statutory dues, accrued expenses and other business-related payables arising from the increase in scale of operations. Accordingly, other current liabilities have been considered while estimating the working capital requirement of the subsidiary.</p>
7	<b>Short Term Provision</b>	<p>Short term provisions mainly include provisions created for expected obligations payable in the normal course of business, such as employee-related obligations, statutory obligations or other business-related provisions, as applicable.</p> <p>Short term provisions are estimated at ₹120.66 lakhs in FY 2026, ₹113.93 lakhs in FY 2027 and ₹151.74 lakhs in FY 2028. The movement is mainly based on expected business operations, employee and statutory obligations, and timing of settlement of such provisions. The increase in FY 2028 is in line with the expected increase in operational scale. Accordingly, short term provisions have been considered while estimating the working capital requirement of the Subsidiary.</p>
9	<b>Funding Pattern</b>	<p>The total working capital requirement of the Subsidiary is proposed to be funded through internal accruals and IPO proceeds. The Subsidiary has considered IPO proceeds of ₹240.00 lakhs in FY 2027 and ₹300.00 lakhs in FY 2028 towards funding the working capital requirement of Croda Pigment Private Limited.</p> <p>The balance working capital requirement is proposed to be funded through internal accruals and other available funds of the Subsidiary, including cash accruals generated from business operations, if any. The proposed funding will support the Subsidiary in meeting its regular working capital needs such as inventory, trade receivables, operational advances and other business requirements.</p> <p>Accordingly, the working capital requirement has been estimated after considering the expected increase in operations, normal operating cycle of the business and the proposed utilization of IPO proceeds for supporting the growth and smooth functioning of the subsidiary.</p>

- c) Weighted Average number of Equity Shares is the number of Equity Shares outstanding at the beginning of the year/period adjusted by the number of Equity Shares issued during year/period multiplied by the time weighting factor. The time weighting factor is the number of days for which the specific shares are outstanding as a proportion of total number of days during the year.

- d) For the purpose of calculating diluted earnings per share, the net profit or loss for the year attributable to equity shareholders and the weighted average number of shares outstanding during the year are adjusted for the effects of all dilutive potential equity shares.

Industry sources and publications generally state that the information contained therein has been obtained from believed to be reliable, but their accuracy, completeness and underlying assumptions are not guaranteed, and their reliability cannot be assured. #### Global Economic Growth

Global economic growth was estimated at **2.7% in 2025**, exceeding earlier projections by approximately 0.4 percentage points, supported by stronger-than-expected performance in major economies, according to international financial institutions such as the International Monetary Fund (IMF) and the World Bank. Growth is expected to moderate to **2.6% in 2026**, primarily due to weakening global trade demand, before recovering marginally to **2.7% in 2027**, supported by easing monetary conditions and improved trade dynamics.

The global economy has demonstrated resilience despite elevated trade tensions and policy uncertainty. This resilience has been supported by front-loaded trade activity ahead of tariff increases, adaptive supply chains, relatively stable financial conditions, and continued investments in emerging technologies such as artificial intelligence (AI). The period from 2021 to 2025 witnessed a strong post-pandemic recovery, although the pace of recovery has been uneven across countries.

Global economic growth has a direct bearing on discretionary consumption patterns, including expenditure on food services, dining, and hospitality.

World Bank forecasts are frequently updated based on new information. Consequently, projections presented here may differ from those contained in other World Bank documents, even if basic assessments of countries' prospects do not differ at any given date. For the definition of EMDEs, developing countries, commodity exporters, and commodity importers, please refer to table 1.2. The World Bank is currently not publishing economic output, income, or growth data for Turkmenistan and República Bolivariana de Venezuela owing to lack of reliable data of adequate quality. Turkmenistan and República Bolivariana de Venezuela are excluded from cross-country macroeconomic aggregates. The region name "Middle East and North Africa" has been revised to "Middle East, North Africa, Afghanistan and Pakistan," reflecting the inclusion of Afghanistan and Pakistan in the region starting July 1, 2025.

1. Headline aggregate growth rates are calculated using GDP weights at average 2010-19 prices and market exchange rates.

2. GDP growth rates are on a fiscal year (FY) basis. Aggregates that include these countries are calculated using data compiled on a calendar year basis. For India and the Islamic Republic of Iran, the column for 2023 refers to FY2023/24. For Bangladesh, the Arab Republic of Egypt, and Ethiopia, the column for 2023 refers to FY2022/23.

3. World growth rates are calculated using average 2010-19 purchasing power parity (PPP) weights, which attribute a greater share of global GDP to emerging market and developing economies (EMDEs) than market exchange rates.

4. World trade volume of goods and nonfactor services.

 5. Indexes are expressed in nominal U.S. dollars (2010=100). Oil refers to the Brent crude oil benchmark. For weights and composition of indexes, refer to <https://worldbank.org/commodities>.

## Global Per Capita Income Trends

Global GDP per capita remains approximately **1% below its pre-pandemic trend in 2025**, indicating an incomplete recovery in income levels. Advanced economies recorded cumulative per capita GDP growth of approximately **13% during 2021–2025**, while emerging markets and developing economies (EMDEs) continue to remain approximately **4% below their pre-pandemic trend**.

The recovery in income levels, particularly in advanced and large emerging economies, is expected to support consumption demand, including discretionary spending categories such as eating out and food services.

## Global Trade Trends

Global trade growth is expected to decline from approximately **3.4% in 2025 to 2.2% in 2026**, reflecting the normalization of earlier front-loaded trade activity and the full impact of tariff measures. Trade growth in 2025 was supported by inventory build-up and stockpiling ahead of anticipated tariff increases, which is expected to reverse in 2026.

Global trade growth is projected to recover to approximately **2.7% in 2027**, broadly in line with overall economic growth, supported by reduced policy uncertainty and stabilization of global trade conditions.

Global trade trends influence supply chains, input costs, and availability of food commodities, which in turn impact the food services industry.

## Global Inflation Outlook

Global inflation is expected to decline from approximately **3.8% in 2026 to 3.4% in 2027**, supported by moderating demand conditions and easing energy prices. Inflation had already declined significantly in 2025, driven in part by lower food prices. The moderation in inflation is expected to support real income growth and improve consumer purchasing power, thereby positively influencing discretionary consumption, including expenditure on dining and hospitality services.

Note: AEs = advanced economies; CPI = consumer price index; EMDEs = emerging market and developing economies; IEs = industrial economies.

## Commodity and Food Price Trends

Commodity prices are expected to decline by approximately **7% in 2026**, following a similar decline in 2025, reflecting slowing global economic activity and lower demand. Commodity prices are projected to recover by approximately **4% in 2027**, supported by supply-side adjustments, particularly in energy markets.

Agricultural commodity prices remained relatively stable in 2025 and are expected to decline modestly in 2026, with further easing anticipated in 2027. Food prices are expected to remain broadly stable over the near term, as supply growth aligns with long-term demand trends. Prices of certain beverage commodities such as coffee and cocoa are expected to moderate, although they may remain elevated compared to historical levels due to prior supply disruptions.

Food price trends are a key determinant of input costs for the food services industry and directly influence menu pricing, margins, and consumer demand.

### Emerging Markets and Developing Economies (EMDEs)

Economic growth in EMDEs was estimated at approximately **4.2% in 2025** and is expected to moderate to around **4.0% during 2026–2027**. Improved global financial conditions are expected to support investment activity; however, this may be partially offset by relatively weaker consumption growth in certain regions.

Over the medium term, investment activity in EMDEs is expected to strengthen, supporting employment generation and income growth. However, demographic pressures remain significant, with approximately **1.2 billion young individuals expected to enter the workforce by 2035**, necessitating sustained job creation.

**E. Number of young people reaching working age by 2035**

**F. Youth population in EMDEs, 2020–25**

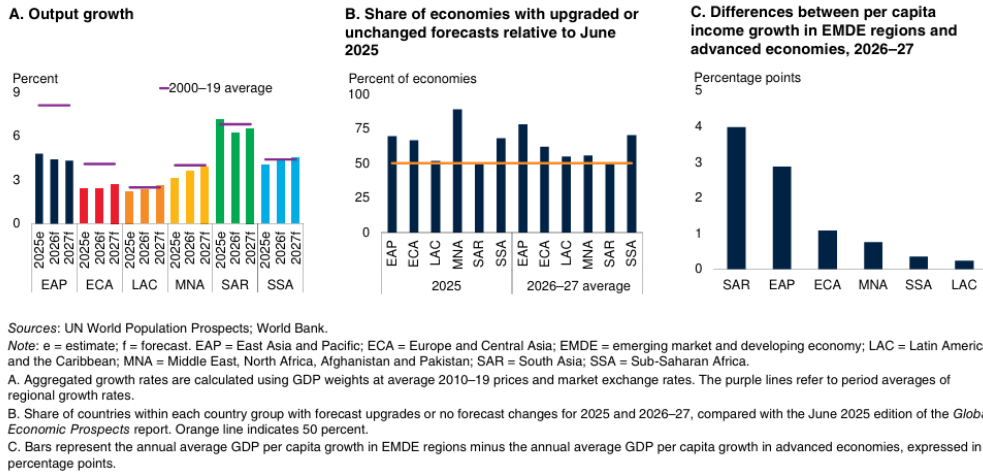

Growth dynamics in EMDEs, including India, are critical for the expansion of the global food services industry, as rising incomes and urbanization in these markets contribute significantly to increased demand for organized dining and food service formats.

### Structural Growth Drivers

Technological advancements, particularly in artificial intelligence (AI), are expected to support productivity gains and enhance business efficiency. Accelerated adoption of AI could potentially increase global economic growth by approximately **0.3 percentage points in 2026**, with an incremental contribution of **0.1% to 0.8% annually over the medium term**.

Such structural improvements in productivity and income levels are expected to have a positive spillover effect on consumption patterns, including demand for premium dining and organized food services.

## GLOBAL CHEMICAL INDUSTRY

The global chemical sector is currently navigating a prolonged downcycle. While the industry initially anticipated a 3.5% production growth rate at the beginning of 2025, a slower recovery has revised these projections downward to 1.9% for 2025 and 2% for 2026. This unexpected volatility and softening of demand are primarily driven by three core factors:

- Weakened Economic Growth:** Global GDP growth forecasts have fallen to 3.0% for 2025 and 3.1% for 2026. This slowdown is particularly visible in major markets like the US, where economic growth is projected to decelerate to 1.8% and 1.4%, respectively, directly cooling down industrial demand.
- Geopolitical and Trade Pressures:** Heightened tensions across Europe and the Middle East continue to reshape global supply chains and delay corporate investments. Reflecting this friction, US chemical imports in 2025 are projected to hit their lowest levels since 2020, while exports are expected to drop to their lowest since 2021.
- Regulatory Shifts:** Fragmentation in government policies is altering project economics. Europe has scaled back parts of its sustainability agenda via a new omnibus package. Similarly, the US is modifying or rescinding key regulations, which reduces compliance burdens but forces companies to recalculate the viability of planned projects.

### Outlook for 2026

Heading into 2026, the industry is nearing the bottom of its capital cycle, burdened by overcapacity and weak customer demand. The outlook for 2026 is slightly weaker than 2025; notably, US production volumes are expected to contract by in 2026 after two consecutive years of stagnant growth. This persistent overcapacity, particularly in basic chemicals, continues to suppress plant operating rates and squeeze manufacturing profit margins.

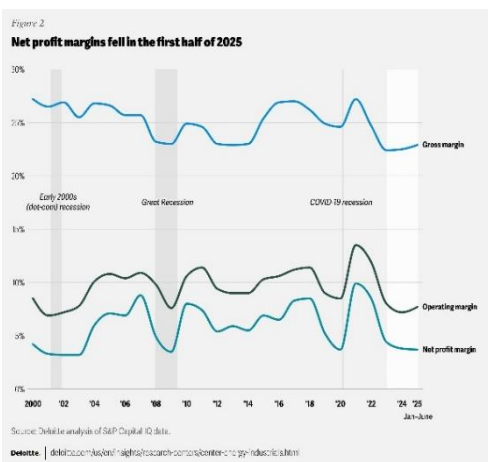

To protect profitability, companies are increasingly aligning their operations around five key industry trends.

- Profit Prioritization: Cash Preservation and Portfolio Restructuring** Historically, the chemical industry maintained robust net profit margins, averaging 5.8% between 2000 and 2020. However, these margins experienced a sharp decline in 2023 and have remained subdued through the first half of 2025. In response to this

margin compression, industry operators are aggressively prioritizing liquidity and operational efficiency.

- Cost Rationalization:** To safeguard free cash flow, companies have instituted strict cost-containment measures. While overall operational expenditures remained flat in the first half of 2025 compared to the previous year, selling, general, and administrative (SG&A) expenses were successfully reduced by 2.3% through workforce optimization and delayed maintenance schedules. Furthermore, industry-wide capital expenditures declined by 8.4% year-over-year in 2024, reflecting a broader hesitation to commit to large-scale investments in a volatile environment.

- Asset Rationalization:** The global market is currently experiencing growing overcapacity in basic and commodity chemicals. Significant new ethylene and polyethylene capacities are scheduled to come online in 2026, primarily in the United States and Qatar, where operators benefit from access to low-cost feedstocks. Concurrently, China continues to aggressively build its polypropylene capacity, driven by national self-sufficiency mandates. As a result, regions facing cost disadvantages, particularly Europe and certain parts of Asia, have witnessed lower plant utilization rates and an increase in facility closures and divestments.

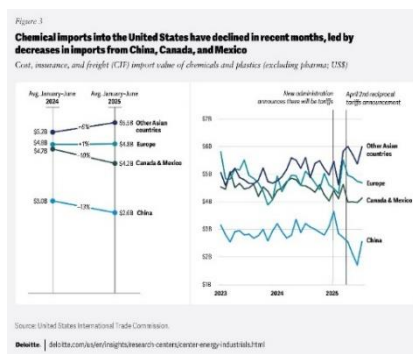

- Strategic Shift to Specialty Chemicals:** To escape the hyper-competitive commodity markets, operators are increasingly pivoting toward specialty chemicals. These tailored, highly specialized products command higher margins and demonstrate greater resilience against global oversupply. Consequently, several major industry players have formally announced strategic initiatives to transition their portfolios away from basic petrochemicals and toward adjacent specialty chemical markets.

- Mergers and Acquisitions (M&A) Landscape:** The prevailing environment of thin margins and oversupply has temporarily stifled M&A activity. The first half of 2025 saw only 243 completed transactions, marking the lowest half-year volume since before the COVID-19 pandemic. However, ongoing portfolio reevaluations are expected to trigger a significant wave of industry consolidation following 2026, once market stability returns.

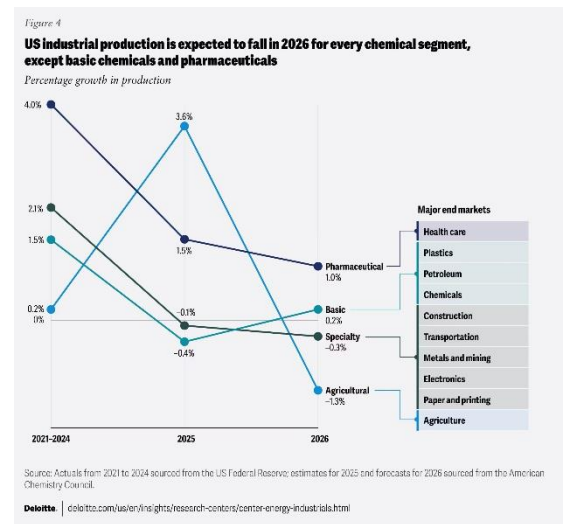

2) **Supply Chain Resilience amidst Geopolitical and Policy Shifts** The industry's supply chains remain highly sensitive to evolving trade policies, tariff shifts, and regional regulations. In April 2025, the Global Economic Policy Uncertainty Index surged to a record high following major reciprocal tariff announcements, heavily impacting global trade flows.

- Inventory and Import Volatility:** In anticipation of shifting tariff regimes, many US importers proactively front-loaded their orders in early 2025. This resulted in US chemical imports spiking to over \$20 billion in March 2025 the highest level in over three years before sharply contracting to \$17 billion in April as excess inventory was absorbed.

- Supply Chain Rerouting:** Escalating trade tensions have forced a significant reshuffling of global supply networks. In the second quarter of 2025, US chemical imports declined by 8% year-over-year. Notably, chemical imports originating from China plummeted by nearly 30% during this period. To mitigate these disruptions, operators have increasingly pivoted to alternative sourcing hubs, with Southeast Asian nations emerging as key alternative suppliers for resins, fibers, and basic chemicals.

- External Supply Pressures:** Geopolitical conflicts continue to strain logistics infrastructure. For instance, ongoing tensions in the Red Sea have necessitated the rerouting of shipping vessels, adding an estimated 8 to 12 days to transit times between the Gulf and Asia. Furthermore, evolving regional frameworks, such as the European Union's Corporate Sustainability Reporting Directive and the Carbon Border Adjustment Mechanism, require enhanced disclosure of sustainability metrics and impose carbon pricing on high-emission imports, fundamentally altering supply chain economics.
- 3) **Uneven End-Market Demand Dynamics** More than 80% of the demand for basic and specialty chemicals is generated by the broader industrial sector. Entering 2026, demand is projected to remain uneven, heavily influenced by cyclical downturns in several core markets, though specific bright spots remain.
- Consumer Goods and Automotive:** Weakening consumer sentiment directly impacts the sector. Global consumer spending growth is projected to decelerate from 2.1% in 2025 to a modest 1.4% in 2026, dampening the demand for chemical inputs used in packaging (plastics, polymers) and personal care items (surfactants, preservatives). Similarly, the automotive sector faces stagnation, with light-vehicle sales projected to remain flat. This stagnation, coupled with the expiration of federal electric vehicle (EV) incentives in September 2025, threatens to suppress demand for key materials such as polyurethane, polypropylene, and epoxy resins, particularly as EVs historically require higher chemical content than internal combustion engine vehicles.
  - Construction:** The construction market remains constrained by elevated interest rates and rising building costs. Following four consecutive years of decline, housing starts are forecasted to grow by a marginal 0.3% in 2026. This sluggish recovery will continue to limit the demand for essential construction chemicals, including concrete admixtures, sealants, and protective coatings.
  - The Semiconductor Bright Spot:** Conversely, the semiconductor industry represents a massive growth vector for specialized chemical producers, driven by the explosive expansion of artificial intelligence (AI) and data centers. The global semiconductor market is forecasted to expand by 11.2% in 2025 and 8.5% in 2026, pushing total market value past \$760 billion, with projections reaching \$1 trillion by 2030. Because specialized chemicals account for 9% to 14% of the bill of materials for electronic devices, chemical suppliers have mobilized significant capital toward multimillion-dollar greenfield investments to produce the ultra-pure gases and solvents required by next-generation chip fabrication plants across the United States and Europe.
- 4) **Innovation and Process Transformation** Despite broader capital constraints, continuous investment in research, development, and operational innovation remains vital to maintaining competitive differentiation.
- Business Model and Process Evolution:** Companies are actively reevaluating their commercial and operational frameworks to maximize resource efficiency. This includes deploying advanced technologies to streamline manufacturing, reduce raw material waste, and lower total energy consumption. Furthermore, to combat commoditization and shrinking margins in standard product lines, operators are focusing R&D efforts on developing transformative, tailored material solutions that address specific, unmet client requirements.
  - The Sustainability Imperative:** Sustainable chemistry will dictate future capital cycles. Current projections indicate that global demand for fundamental chemical building blocks will double over the next 30 years. Fulfilling these sustainability goals will require an estimated \$1 trillion in cumulative capital investment by 2080. Consequently, companies are accelerating investments into proven, low-carbon production technologies including

carbon capture systems, clean hydrogen fuel alternatives, and facility electrification to secure long-term market viability.

- 5) **Accelerated Adoption of Artificial Intelligence (AI)** The deployment of intelligent digital applications is rapidly shifting from experimental back-office tools to mission-critical operational necessities. Currently, 51% of US manufacturers utilize AI in their daily operations, and 80% view the technology as essential to maintaining business viability by 2030.
- **Operational Excellence:** Early adopters are already realizing significant returns on investment on the factory floor. In one notable industry case, a major diversified chemical producer deployed nearly 500 distinct AI models across its manufacturing footprint. Over 40% of its facilities now leverage AI for automated control systems and real-time operational insights, resulting in measurable improvements in safety compliance, optimized asset utilization, and significantly reduced energy consumption.

**R&D Acceleration:** Traditional chemical research and development is notoriously slow and capital-intensive due to its reliance on physical trial-and-error experimentation. By integrating supervised machine learning and molecular structure-based diffusion models, companies can now digitally predict material properties and rapidly screen viable candidate molecules. This digital approach has drastically compressed R&D cycle times, lowered developmental expenses, and accelerated the commercialization of innovative new products.

### **Moving into 2026: Chemical industry to emerge from the downturn**

2026 is expected to remain challenging for the chemical industry. Overcapacity in polyethylene, polypropylene, and other olefins and aromatics will likely persist. Without renewed market certainty and stability, end-market demand will likely remain subdued, and complex market conditions will continue to strain the industry.

As in previous downcycles, the industry is expected to prioritize cash flow, restructure portfolios, and focus on growth and innovation where possible. Companies are expected to base decisions on data and fundamentals, rather than short-term noise, while considering how the downcycle may accelerate industry transformation.

As 2026 unfolds, the industry will be watching for signs that this downcycle is coming to an end. Four main levers could signal that end (figure 6), with several factors influencing those levers. In today's uncertain environment, predicting the end of the downcycle is challenging; companies that stay flexible and adaptable may emerge stronger.

## INDIAN ECONOMY OUTLOOK

India's economic momentum remains strong, underpinned by resilient domestic demand and sustained macroeconomic stability. In FY 2025–26, Real GDP (GDP at Constant Prices) is estimated to reach Rs. 3,22,58,000 crore, rising from Rs. 2,99,89,000 crore in FY 2024–25, reflecting a robust growth of 7.6%. At current prices, Nominal GDP is projected to reach Rs. 3,45,47,000 crore (US\$ 3.91 trillion) in FY 2025–26, from Rs. 3,18,07,000 crore (US\$ 3.60 trillion) in the previous year, registering a growth of 8.6%. On the production side, Real Gross Value Added (GVA) is estimated at Rs. 2,94,40,000 crore, up from Rs. 2,73,36,000 crore in FY 2024–25, indicating a growth of 7.7%, while Nominal GVA is expected to expand to Rs. 3,13,61,000 crore (US\$ 3.55 trillion) from Rs. 2,88,54,000 crore (US\$ 3.26 trillion), marking a growth of 8.7%. In Q3 FY26, Real GDP is estimated at Rs. 84,54,000 crores against Rs. 78,41,000 crores in Q3 FY25, while Nominal GDP rose to Rs. 90,91,000 crores from Rs. 83,46,000 crores, showing continued quarterly momentum. Collectively, these trends highlight India's position as one of the fastest-growing major economies, supported by broad-based expansion across sectors.

India is home to 126 unicorns, with six new startups achieving unicorn status in 2025. India's current account deficit widened in Q3 FY 2025–26 (October–December), primarily due to a higher merchandise trade deficit. The deficit stood at Rs. 1.18 lakh crore (US\$ 13.2 billion), compared with Rs. 0.95 lakh crore (US\$ 11.3 billion) in the same quarter last year. The merchandise trade deficit increased to Rs. 8.34 lakh crore (US\$ 93.6 billion) from Rs. 6.70 lakh crore (US\$ 79.3 billion) in Q3 FY25, while the services surplus improved to Rs. 5.12 lakh crore (US\$ 57.5 billion) from Rs. 4.32 lakh crore (US\$ 51.2 billion) during the same period.

India is primarily a domestic demand-driven economy, with consumption and investments contributing to 70% of the economic activity. With India's economy showing resilient growth, supported by strong domestic demand, policy reforms, and a healthy investment pipeline, several new projects and developments are underway across key sectors. According to World Bank, India must continue to prioritise lowering inequality while also putting growth-oriented policies into place to boost the economy. In view of this, there have been some developments that have taken place in the recent past. Some of them are mentioned below.

- 1) On the FDI front, according to the Department for Promotion of Industry and Internal Trade (DPIIT), India's cumulative FDI inflow stood at US\$ 1.14 trillion between April 2000–December 2025; with major share of FDI equity inflow, coming from Singapore at Rs. 13,72,320 crore (US\$ 192.53 billion) with a total share of 25%, followed by Mauritius at Rs. 11,34,884 crore (US\$ 185.02 billion) with 24%, the USA at Rs. 5,60,990 crore (US\$ 78.45 billion) with 10%, the Netherlands at Rs. 3,82,995 crore (US\$ 55.60 billion) with 7%, and Japan at Rs. 3,11,507 crore (US\$ 47.59 billion) with 6%.
- 2) As of March 27, 2026, India's foreign exchange reserves stood at Rs. 65,20,745 crore (US\$ 688.05 billion).
- 3) In Q1 CY2026 (January–March), India recorded 316 Private Equity (PE)–Venture Capital (VC) deals valued at Rs. 82,660 crore (US\$ 9.1 billion), reflecting continued investor participation despite global geopolitical uncertainties and temporary supply chain disruptions linked to the ongoing West Asia conflict. In Q1 CY2025, PE-VC investments stood at Rs. 1,01,320 crore (US\$ 11.7 billion), highlighting the strong base of investment activity in the previous year. In March 2026 alone, investments were valued at Rs. 35,310 crore (US\$ 3.8 billion), compared with Rs. 40,660 crore (US\$ 4.7 billion) in March 2025.
- 4) During FY 2025–26, Foreign Portfolio Investor (FPI) activity in India reflected portfolio rebalancing and selective capital allocation across asset classes amid evolving global market conditions. While investors adopted a calibrated approach towards equity markets, debt instruments continued to attract strong inflows of Rs. 25,807 crore (US\$ 2.92 billion), supported by stable macroeconomic fundamentals, policy continuity and India's improving bond market attractiveness. FPIs also channelled Rs. 2,699 crore (US\$ 0.31 billion) into mutual fund schemes, indicating sustained preference for diversified and professionally managed market exposure.

Alternative Investment Funds (AIFs) also recorded inflows, while cumulative FPI investments in India stood at Rs. 14,84,403 crore (US\$ 168.00 billion) by the end of FY 2025–26, underlining long-term foreign investor confidence in India’s growth story. Domestic Institutional Investors (DIIs) continued to play a stabilising role in the equity cash market during FY 2025–26 (April–December 2025), recording net purchases of around Rs. 5.99 lakh crore (US\$ 66.55 billion), with strong participation from mutual funds, insurance companies and pension funds supporting market resilience.

- 5) India’s manufacturing sector remained in expansionary territory in March 2026, with the seasonally adjusted HSBC India Manufacturing Purchasing Managers’ Index (PMI) at 53.9, following a strong 56.9 in February 2026. The index continued to stay above the neutral 50-mark, reflecting sustained growth in overall business conditions and healthy momentum across the manufacturing sector. New orders and output continued to rise, supported by steady domestic demand and inventory building, while firms also increased employment and input purchases to strengthen contingency stocks.
- 6) India’s consumer price inflation remained well-anchored in March 2026, reflecting a stable price environment across the economy. Headline inflation, based on the All-India Consumer Price Index (CPI), stood at 3.40% year-on-year, compared with 3.21% in February 2026, indicating manageable price pressures across both rural and urban regions. Rural inflation was recorded at 3.63%, while urban inflation stood at 3.11% during the month.
- 7) India’s GST collections continued to demonstrate strong revenue resilience, supported by steady economic activity and improved compliance levels. Total Net GST revenue in March 2026 stood at Rs. 1.78 lakh crore (US\$ 20.14 billion), registering a year-on-year growth of 8.2% compared with Rs. 1.64 lakh crore (US\$ 18.49 billion) in March 2025. On a cumulative basis, yearly net GST collections reached Rs. 19.35 lakh crore (US\$ 219.03 billion) in FY 2025–26, reflecting a year-on-year growth of 7.1% over Rs. 18.07 lakh crore (US\$ 204.46 billion) in FY 2024–25.
- 8) India’s aviation sector continued to witness steady growth in passenger traffic during FY 2025–26 (April–March). Total passengers handled stood at 420.09 million, compared with 412.09 million in FY 2024–25, registering a growth of 1.9%.
- 9) The government is focusing on renewable energy sources and has achieved a major clean energy milestone by generating 50% of its power from renewable sources, five years ahead of its 2030 target. India is committed to achieving its Net Zero Emissions ambition by 2070 through a five-pronged strategy, ‘Pancharjit’. Moreover, India ranked 3rd in the renewable energy country attractiveness index.
- 10) India secured 38th position out of 139 economies in the Global Innovation Index 2025. India rose from 81st position in 2015 to 38th position in 2024. India ranks in 3rd position in the global number of scientific publications.
- 11) India’s industrial activity continued to witness steady expansion in March 2026, with the Index of Industrial Production (IIP) growing by 4.1% year-on-year, supported by sustained momentum across key sectors. The manufacturing sector recorded a 4.3% increase, while mining expanded by 5.5%, reflecting strength in core industrial segments. Electricity generation also remained positive at 0.8%, contributing to overall industrial performance. The IIP index rose to 173.2 in March 2026, up from 166.3 in March 2025, indicating continued expansion in India’s industrial base. Within manufacturing, 14 out of 23 industry groups recorded growth, with key contributors including basic metals, motor vehicles and machinery & equipment, highlighting broad-based industrial activity.
- 12) The government has set a calibrated wheat procurement target of 343.35 lakh metric tonnes (LMT) for the 2026–27 rabi marketing season, ensuring efficient stock management and smooth market operations. As per the latest data, total wheat procurement has reached 31.87 lakh metric tonnes (LMT) as of end-April 2026, reflecting the ongoing progress of procurement across key producing states.

## Government Initiatives

Over the years, the Indian government has introduced many initiatives to strengthen the nation's economy. The Indian government has been effective in developing policies and programmes that are not only beneficial for citizens to improve their financial stability but also for the overall growth of the economy. Over recent decades, India's rapid economic growth has led to a substantial increase in its demand for exports. Besides this, a number of the government's flagship programmes, including Make in India, Start-up India, Digital India, the Smart City Mission, and the Atal Mission for Rejuvenation and Urban Transformation, are aimed at creating immense opportunities in

India. In this regard, some of the initiatives taken by the government to improve the economic condition of the country are mentioned below:

## Industry Growth Drivers

The robust expansion of the Indian chemical ecosystem is underpinned by several macroeconomic and structural growth drivers:

- Rising Domestic Demand & Middle-Class Expansion:** India's middle-class population is projected to grow to 148 million by 2030, covering approximately 80% of households. This demographic shift is accelerating urbanization and driving domestic demand for end-user segments such as personal care, housing/construction, packaging, and agrochemicals. The Indian government's vision to increase manufacturing's share of GDP from 14% to 23% over the next two decades acts as a primary catalyst.

- Shifting Global Supply Chains & Foreign Investment:** Geopolitical tensions and the desire to de-risk supply chains away from China present significant opportunities for India. Global companies are increasingly shifting production to Asian and Southeast Asian countries. India allows 100% FDI under the automatic route for the chemical sector (excluding hazardous chemicals), driving strong foreign and domestic investments into greenfield and brownfield projects.
- Export Competitiveness & Trade Agreements:** Excluding pharmaceuticals, India ranks 9th globally in chemical exports. In FY26 (April-June), exports of chemicals and allied products reached Rs. 80,413 crore (US million) for FY26]\*

## Government Initiatives and Policy Support

The Government of India has established a highly supportive policy framework to catalyze capital expenditure and establish India as a global manufacturing hub by 2030.

### Union Budget FY 2026-27: Chemical Parks & CCUS Push

Recognizing the need for plug-and-play manufacturing ecosystems, the Union Budget 2026–27 announced a dedicated scheme to support States in establishing three new **Chemical Parks** via a challenge-based route. A budgetary allocation of Rs. 600 crore has been earmarked for BE FY 2026–27. These parks will provide shared infrastructure, common utilities, and standard environmental compliance facilities to reduce project gestation timelines and capital costs.

Additionally, to ensure environmental sustainability, the 2026-27 budget allocated a massive **Rs. 20,000 crore** to support the development and deployment of **Carbon Capture, Utilisation, and Storage (CCUS)** technologies across emission-intensive industries, including chemicals, over the next five years.

**PCPIRs (Petroleum, Chemicals and Petrochemical Investment Regions)** The government has established operational PCPIRs to foster cluster-based holistic development. These include:

- **Dahej (Gujarat):** Spanning 453 Sq. Kms, it has attracted investments of Rs. 1,28,509 crore and generated over 2.45 lakh jobs. The Anchor Tenant is ONGC Petro-additions Ltd.
- **Paradeep (Odisha):** Spanning 284.15 Sq. Kms, it has attracted Rs. 1,43,881 crore in investment. Indian Oil Corporation is the anchor tenant.
- **Vishakhapatnam-Kakinada (Andhra Pradesh):** Spanning 640 Sq. Kms, it has attracted Rs. 68,148 crore.

**Plastic Parks and Bulk Drug Parks** To consolidate downstream capacities, the government provides grant funding (up to 50% of project costs, capped at Rs. 40 crore) for setting up **Plastic Parks**. Ten parks have been approved in states like Madhya Pradesh, Odisha, Tamil Nadu, and Assam. Similarly, an outlay of Rs. 3,000 crore has been directed toward three **Bulk Drug Parks** in Gujarat, Himachal Pradesh, and Andhra Pradesh to ensure raw material security for pharmaceuticals and provide shared utilities like central effluent treatment plants.

**Quality Control Orders (QCOs) and BIS Standards** To prevent the dumping of spurious chemicals and protect health and the environment, the Department has rolled out mandatory Quality Control Orders (QCOs) under the Bureau of Indian Standards (BIS) Act, 2016. Imports and domestic manufacturing for critical chemicals must now bear the BIS Standard Mark.

## THE ROAD AHEAD: INDUSTRY OUTLOOK 2026

**Projections for 2026** The *Chemical Industry Outlook 2026* projects moderate global growth driven by sustainability and digitization, positioning the Asia-Pacific region as the dominant engine of expansion. Notably, **India is projected to see its chemical production increase by an exceptional 10.9% in 2026**, outperforming the flat outputs expected in the U.S. and sluggish recovery in Europe. This growth is fueled by robust domestic demand and targeted government support.

(Source: <https://www.indianchemicalnews.com/compendium-2026> )

**Trends in Sustainability and Green Chemistry** The transition toward green chemistry is reshaping the sector. The Indian green chemicals market is forecasted to grow at a CAGR of over 10%, exceeding US\$ 15 billion by 2027.

**Key Challenges** Despite the optimistic outlook, the industry faces persistent structural hurdles:

- **Global Trade Uncertainty:** Tariffs and geopolitical tensions complicate long-term supply chain planning.
- **Energy and Feedstock Volatility:** High energy and feedstock costs remain a persistent issue, weakening long-term cost competitiveness.
- **Regulatory Compliance:** Adhering strictly to changing environmental laws, managing POPs (Persistent Organic Pollutants) under the Stockholm Convention, and navigating the Prior Informed Consent (PIC) procedures of the Rotterdam Convention require significant operational focus.

**Conclusion:** The Indian chemical industry enters 2026 at a dynamic inflection point. With an expanding middle class driving end-user demand, shifting global supply chains benefiting Indian manufacturing, and aggressive government policy support (Union Budget 2026-27 Chemical Parks, CCUS funding, PLIs, and PCPIRs), the sector is primed for aggressive expansion. Investments in green chemistry, backward value-chain integration, and world-class technological infrastructure will be the defining metrics of success for chemical enterprises scaling over the next decade.

- a) **Raw Material Preparation:** Before loading into Reactor (Vessel), raw materials such as Mono Ethylene Glycol (MEG), Propylene Glycol (PG), Diethylene Glycol (DEG), Maleic Anhydride (MA), and Phthalic Anhydride (PA) undergo quality checks and are stored in designated areas.
- b) **Reactor Operation:** The loading process involves precise measurements and controlled handling to ensure accurate composition of the mixture. Reactor (Vessel) is a controlled environment where the raw materials are combined under specific conditions.
- c) **Temperature and Time Control:** Temperature and time parameters are crucial for initiating and completing chemical reactions within the reactor. Setting the temperature at 210 degrees Celsius and allowing the machine to run for 11 to 12 hours ensures proper mixing and reaction of the raw materials.

### 2) Transfer to Blender

- a) **Material Handling:** Once the reaction in Reactor is complete, the processed material is transferred to Blender using appropriate handling equipment to prevent contamination or spills.
- b) **Styrene Monomer Addition:** Styrene monomer is introduced into the blend in Blender to achieve desired chemical properties and enhance product performance. Mixing is carefully monitored to ensure uniform distribution of styrene monomer throughout the material.

### 3) Testing

- a) **Quality Assurance Tests:** Gel time testing determines the curing time of the material, which is critical for assessing its usability in various applications. Viscosity testing helps evaluate the flow characteristics and consistency of the material, ensuring it meets required specifications.
- b) **Quality Control Standards:** Test procedures are conducted according to established quality control standards to maintain consistency and reliability in product performance. Results are compared against predefined acceptance criteria to validate product quality.

### 4) Packaging

- a) **Packaging Specifications:** Barrels and canes of different capacities such as 30 kgs, 10 kgs, and 5 kgs are selected based on product volume and customer requirements. Packaging materials are chosen to provide adequate protection against environmental factors and physical damage during handling and transportation.

- b) **Labelling and Sealing:** Each package is labelled with essential information such as product name, batch number, production date, and handling instructions. Sealing mechanisms are applied to ensure product integrity and prevent tampering during transit.

#### 5) Quality Assurance

- a) **Continuous Monitoring:** Quality control measures are integrated into every stage of the production process to identify and address any deviations from quality standards promptly.
- b) **Corrective Actions:** If quality issues are detected, corrective actions are implemented to rectify the root cause and prevent recurrence. This may involve adjusting process parameters, retesting materials, or conducting additional inspections.

#### 6) Environmental and Safety Considerations

- a) **Safety Protocols:** Strict adherence to safety protocols and regulations is paramount to safeguard the well-being of personnel and prevent accidents or incidents in the production facility.
- b) **Environmental Compliance:** Compliance with environmental regulations involves minimizing waste generation, optimizing resource utilization, and implementing pollution control measures to mitigate the environmental impact of production activities.

#### 7) Distribution

- a) **Logistics Planning:** Efficient distribution logistics are essential for timely delivery of products to customers or storage facilities. Transportation routes, modes, and schedules are carefully planned to optimize cost- effectiveness and minimize delivery lead times. The company engaged third party service providers as and when required.
- b) **Customer Satisfaction:** Customer needs and preferences are prioritized to ensure satisfaction with product quality, packaging integrity, and delivery reliability. Feedback mechanisms are established to gather customer input and address any concerns promptly.

#### 8) Documentation and Record-Keeping

- a) **Comprehensive Documentation:** Accurate and detailed documentation is maintained for all aspects of the production process, including raw material sourcing, manufacturing procedures, quality control tests, and packaging specifications.
- b) **Audit Trail:** The documentation serves as an audit trail for traceability and accountability purposes, enabling effective tracking of product lineage, batch history, and compliance with regulatory requirements.

#### 9) Continuous Improvement

- a) **Process Optimization:** Continuous evaluation and optimization of production processes are conducted to enhance efficiency, reduce costs, and improve product quality over time.
- b) **Innovation and Research:** Investment in research and development initiatives fosters innovation and drives advancements in material science, technology, and manufacturing practices to stay competitive in the market and meet evolving customer needs.

## Manufacturing Process for Pigments

### Manufacturing Process step wise:

- 1) **Raw Material Preparation:** The manufacturing process begins with the receipt of raw materials, i.e. resin and chrome titanium, which are stored and organized according to their specific categories. To initiate production, resin is transferred to the mixture container. Following this, chrome and titanium are added to the resin based on a pre-determined formulation tailored for the desired output specifications.
- 2) **Mixing and Grinding:** Once the raw materials are properly mixed, the composite material is then transferred to rolling machines. This stage involves the primary grinding process, where the mixture is grounded according to established specifications. The grounded material is subsequently processed through temperature-controlled rolls, ensuring uniformity and quality.
- 3) **Quality Testing:** After the rolling process, the material undergoes rigorous testing in the laboratory to verify that it meets the design specifications and quality standards required for the final product.
- 4) **Packaging:** Upon passing quality control checks, the finished product is carefully packaged in jars or containers of various capacities, based on client requirements. Each jar is sealed, and labels are affixed. A shrinking process is applied to ensure proper sealing and branding.
- 5) **Distribution:** Finally, the packaged jars are placed in cartons and transferred to the dispatch section or storage area in accordance with order requirements, ensuring efficient distribution to clients.

### Trading vertical

Our trading vertical, comprising fiber resin products, hardeners, ancillary products and silicone-based products, complements our manufacturing vertical of Unsaturated Polyester Resins (“UPRs”) and enables us to offer a wider and more integrated product portfolio to our customers.

**Hardeners and ancillaries** are essential for the curing process of resins. UPRs are typically supplied in liquid form and require catalysts, hardeners, cobalt, promoters and related chemicals to initiate and control the curing process, pursuant to which the liquid resin converts into a solid and usable product. These materials are therefore critical for customers using our resins in moulding, coating, lamination and FRP applications. Ancillary products such as FRP brushes, wax polish, pigment pastes, styrene monomer, PVA powder, French chalk powder, marble powder and polyester film serve as supporting inputs in resin and FRP applications. These products assist in improving workability, finish, colour, release properties, surface appearance and process efficiency for end-users. As on the date of this Draft Red Herring Prospectus, our Company has a portfolio of 14 SKUs of Hardeners and ancillaries.

**Fiber Resin products** act as reinforcement materials and are commonly used along with UPRs to manufacture fiber resin reinforced plastic products, commonly known as FRP products. When UPR is combined with fiber resin, the resulting product gains improved strength, rigidity, durability, impact resistance and dimensional stability. These materials are used in applications such as FRP sheets, cooling towers, automobile components, fibre sheets, waterproofing products, panels, moulded products and decorative articles. As on the date of this Draft Red Herring Prospectus, our Company has a portfolio of 10 SKUs of fiber resin products.

**Silicone-based products** complement our resin and fiber resin product offerings by catering to mould-making, sealing, bonding, insulation, lubrication and adhesive applications. Silicone rubbers, silicone hardeners, silicone oils, silicone sprays and silicone adhesives are used by customers who require flexibility, heat resistance, sealing

performance and moulding support in industrial and decorative applications. As on the date of this Draft Red Herring Prospectus, our Company has a portfolio of 6 SKUs of fiber resin products.

Our established supplier network ensures reliability, consistency, and timely availability of raw materials, supporting the seamless continuity of our operations. We have developed strong and long-standing relationships with our suppliers over the years, which enables us to procure raw materials on competitive terms. These strong supplier relationships also enhance our trading operations, allowing us to source quality products from established and reputable suppliers. This, in turn, enables us to offer a diverse and reliable range of products to our customers. Our ability to maintain stable and mutually beneficial relationships with our suppliers strengthens our supply chain efficiency and supports our ability to consistently meet customer requirements.

## **OUR STRATEGIES**

### ***Forward Integration with subsidiary to achieve operational efficiency***

Our company acquired our subsidiary, Croda Pigments Private Limited, in Financial year 2023-24. The UPRs manufactured by our company are used as key chemical inputs in various industrial and household applications. Our Subsidiary, is engaged in the manufacturing of pigments, which are used for imparting colour, finish, shade and visual appeal to various products. Certain resin-based products manufactured by Amtech may be used by CPPL in its pigment manufacturing and related application processes, thereby creating an internal supply linkage between the two entities. This integration enables us to move towards a more coordinated and efficient operating model, where the output of Amtech's manufacturing vertical can be used as an input in CPPL's pigment business. Such a structure supports forward integration, improves supply chain reliability, reduces dependence on external suppliers for relevant inputs, and allows better control over quality, pricing and availability of materials.

The integration between Amtech and CPPL also creates operational synergies, as both companies operate in allied complementary product segments and cater to overlapping industrial and household applications. By aligning procurement, production planning, quality control and customer requirements at the group level, we are able to improve resource utilisation and strengthen our overall product offering.

Further, this strategy enables us to offer a broader range of products across the resin and pigment value chain. The use of Amtech's manufactured products in CPPL's operations allows us to enhance internal consumption opportunities, improve cost efficiencies and support consistency in product quality. It also enables CPPL to benefit from access to resin inputs manufactured within the group, while Amtech benefits from a captive or strategic demand channel for its resin products.

### ***Inorganic and Organic Expansion***

Our growth strategy is focused on a combination of organic expansion and inorganic expansion, enabling us to strengthen our manufacturing capabilities, broaden our product portfolio and enhance our presence in the industry.

We have been expanding our operations by expanding our manufacturing capabilities, improving plant and machinery, enhancing production efficiency and strengthening our product offerings. In line with this strategy, we have expanded our manufacturing operations at our Asoda manufacturing facility for UPRs manufacturing, which has enabled us to support higher production requirements and cater to the growing demand for our resin products. Further, we are also undertaking expansion of plant and machinery in CPPL, to enhance its pigment manufacturing capabilities and improve operational efficiencies, the details of which can be referred from the object, "*Investment in our subsidiary, by way of debt towards, a) funding capital expenditure requirement and b) to meet incremental working capital requirement of the subsidiary*" in the chapter, "*Objects of the Issue*", beginning on page no. 80. By investing in plant and machinery, we aim to increase our manufacturing capabilities of pigments, support product development and enhance our ability to cater to evolving customer requirements.

In addition to organic growth, our Company has also pursued inorganic expansion through the acquisition of Croda Pigments Private Limited, which is engaged in the manufacturing of pigments used in various industrial and household products and operates in a business that is vertically aligned with our existing operations. This acquisition has enabled us to expand into a complementary product category, strengthen our group-level product portfolio and

derive synergies across resin, pigment and allied chemical products. Further, we may expand organically to support our long-term growth, strengthen our manufacturing base, improve customer reach and enhance our competitiveness in the resin, pigment and allied chemicals industry.

### ***Expansion of Geographical Footprint in India across various industries***

Our products cater to a wide range of end-use industries, including FRP, automotive, electrical and switchgear, decorative products, construction, waterproofing, apparel accessories, industrial moulding, paints, coatings and household products. Since these industries have demand across multiple regions, expanding our geographical reach enables us to access a broader customer base and reduce dependence on any single market or region.

We aim to strengthen our market presence through regular engagement with existing customers, identification of new customers, expansion of our dealer and distribution network, and increased focus on industries and regions where our products have application potential. Our integrated product portfolio, comprising manufactured UPRs and traded complementary products such as fiber resin, hardeners, silicones and ancillary materials, allows us to cater to customers across different stages of the resin and FRP value chain, thereby supporting market penetration in new territories.

We intend to deepen our presence in regions where we already have an established customer base, while also exploring opportunities in new geographies with demand for resins, pigments, fiber resin, hardeners, silicones and other allied chemical products. The details of geographical-wise revenue bifurcation are as follows:

The above sensitivity analysis are based on a change in an assumption while holding all other assumptions constant. In practice, this is unlikely to occur and changes in some of the assumptions may be correlated. When calculating the sensitivity of the defined benefit obligation to significant actuarial assumptions the same method (present value of the defined benefit obligation calculated with the projected unit credit method at the end of the reporting period) has been applied which was applied while calculating the defined benefit obligation recognised in the balance sheet.

The methods and types of assumptions used in preparing the sensitivity analysis did not change compared to prior period.

The marginal movement was mainly on account of normal operating expenses, depreciation and finance costs during the period. However, the Company continued to maintain healthy profitability, supported by its manufacturing and trading operations, improved utilization of facilities and contribution from the integrated resin and pigment business.

### **COMPARISON OF F.Y. 2025 WITH F.Y. 2024:**

#### **Revenue of operations**

Revenue from operations increased by ₹1,228.32 lakhs, i.e. 49.92%, from ₹2,460.37 lakhs in Fiscal Year 2024 to ₹3,688.69 lakhs in Fiscal Year 2025. The increase was mainly supported by higher sales from manufacturing and trading operations. Further, actual production of UPRs increased from 1,255 MTPA in Fiscal Year 2024 to 1,879 MTPA in Fiscal Year 2025, and capacity utilisation improved from 50.38% to 75.43%, which supported higher sales during the year. Pigment production also increased from 127.14 MTPA in Fiscal Year 2024 to 310 MTPA in Fiscal Year 2025.

#### **Other Income**

Other income decreased by ₹255.70 lakhs, i.e. 97.01%, from ₹263.58 lakhs in Fiscal Year 2024 to ₹7.88 lakhs in Fiscal Year 2025. The decrease was mainly because Fiscal Year 2024 included gain on sale of investment of ₹238.55 lakhs, which was non-recurring in nature. Further, Fiscal Year 2024 also included interest income of ₹13.87 lakhs, dividend income of ₹4.83 lakhs, profit on sale of fixed assets of ₹2.91 lakhs and rental income of ₹2.87 lakhs. In comparison, other income in Fiscal Year 2025 mainly comprised miscellaneous income of ₹7.61 lakhs, foreign exchange gain of ₹0.16 lakhs, interest income of ₹0.09 lakhs and profit on sale of fixed assets of ₹0.02 lakhs. Accordingly, the decrease in other income was primarily due to absence of such higher non-operating income in Fiscal Year 2025.

#### **Cost of Goods Sold**

Cost of goods sold increased by ₹780.49 lakhs, i.e. 41.30%, from ₹1,889.64 lakhs in Fiscal Year 2024 to ₹2,670.13 lakhs in Fiscal Year 2025. Cost of goods sold in Fiscal Year 2025 was computed by aggregating cost of goods consumed of ₹2,273.37 lakhs and purchases of stock-in-trade of ₹435.88 lakhs, adjusted by changes in inventories of ₹(39.12) lakhs. Cost of goods sold in Fiscal Year 2024 was computed by aggregating cost of goods consumed of ₹1,516.45 lakhs and purchases of stock-in-trade of ₹366.38 lakhs, adjusted by changes in inventories of ₹6.81 lakhs.

The increase was mainly due to higher production and sales volume during Fiscal Year 2025. Cost of goods consumed increased in line with higher consumption of raw materials for manufacturing operations, while purchases of stock-in-trade also increased due to higher trading of complementary products such as fiberresin products, hardeners, silicones and other ancillary products. The increase was partly offset by changes in inventories, reflecting higher closing inventory of finished goods, work-in-progress and stock-in-trade at the year end.

#### **Employee benefit expense**

Employee benefit expenses decreased marginally by ₹1.67 lakhs, i.e. 0.75%, from ₹223.09 lakhs in Fiscal Year 2024 to ₹221.43 lakhs in Fiscal Year 2025. The decrease was mainly due to lower gratuity expense during Fiscal Year 2025. However, the overall employee cost remained broadly stable as the Company continued to incur salaries, wages, director remuneration, contribution to provident and other funds, leave encashment and staff welfare expenses in line with its business operations.

As a percentage of total income, employee benefit expenses reduced from 8.19% in Fiscal Year 2024 to 5.99% in Fiscal Year 2025, mainly due to increase in total income during Fiscal Year 2025.

### Finance Cost

Finance costs increased marginally by ₹2.04 lakhs, i.e. 4.81%, from ₹42.52 lakhs in Fiscal Year 2024 to ₹44.56 lakhs in Fiscal Year 2025. The increase was mainly due to interest cost and bank charges incurred for borrowings and working capital requirements. However, as a percentage of total income, finance costs decreased from 1.56% in Fiscal Year 2024 to 1.21% in Fiscal Year 2025, reflecting better absorption of finance costs with increase in scale of operations.

### Depreciation and Amortization Expenses

Depreciation and amortization expenses increased by ₹52.31 lakhs, i.e. 114.89%, from ₹45.53 lakhs in Fiscal Year 2024 to ₹97.84 lakhs in Fiscal Year 2025. The increase was mainly due to full-year depreciation impact of assets added during Fiscal Year 2024 amounting to ₹463.14 lakhs, which were added during the year and accordingly had partial depreciation impact in Fiscal Year 2024. Further, during Fiscal Year 2025, the Group made additional capital additions of ₹323.67 lakhs, including additions to office building, plant and machinery, office equipment and other fixed assets, which further increased the depreciable asset base. Accordingly, depreciation and amortization expenses increased during Fiscal Year 2025.

### Other Expenses

Other expenses decreased by ₹35.98 lakhs, i.e. 19.67%, from ₹182.91 lakhs in Fiscal Year 2024 to ₹146.93 lakhs in Fiscal Year 2025. The decrease was mainly due to reduction in commission expenses from ₹42.94 lakhs to ₹8.27 lakhs, repair and maintenance expenses from ₹49.44 lakhs to ₹29.38 lakhs, legal and professional charges from ₹24.85 lakhs to ₹12.03 lakhs, rates and taxes from ₹11.97 lakhs to ₹0.17 lakhs and travelling and conveyance expenses from ₹9.05 lakhs to ₹2.59 lakhs.

The above reduction was partly offset by increase in certain operating expenses, including advertisement and sales promotion expenses from ₹1.24 lakhs to ₹25.50 lakhs, power and fuel expenses from ₹12.39 lakhs to ₹19.52 lakhs, freight and cartage expenses from ₹9.96 lakhs to ₹16.78 lakhs and rent expenses from ₹10.70 lakhs to ₹15.66 lakhs. The increase was mainly in line with higher taxable profits during Fiscal Year 2025, as profit before tax increased from ₹340.25 lakhs in Fiscal Year 2024 to ₹515.68 lakhs in Fiscal Year 2025. Accordingly, higher profitability resulted in higher current tax / overall tax expense during Fiscal Year 2025.

### Restated Profit after Tax

Restated profit after tax increased by ₹224.48 lakhs, from ₹285.11 lakhs in Fiscal Year 2024 to ₹379.41 lakhs in Fiscal Year 2024. PAT margin on revenue from operations stood 10.26% in Fiscal Year 2025 as compared to 11.59% in Fiscal Year 2024. Although the PAT margin moderated marginally, the profitability remained healthy. The moderation was mainly because Fiscal Year 2024 included higher non-operating income, particularly gain on sale of investment, which supported profit in that year. In Fiscal Year 2025, profitability was largely supported by core business operations, including higher manufacturing and trading sales.

Further, cost of goods sold as a percentage of revenue from operations reduced from 76.80% in Fiscal Year 2024 to 72.39% in Fiscal Year 2025, indicating improved gross contribution. This was partly offset by higher depreciation and amortization expenses and higher tax expenses during Fiscal Year 2025. Overall, the increase in absolute PAT reflects improved scale of operations and better operating performance during Fiscal Year 2025.

Accordingly, Fiscal Year 2024 includes revenue contribution from the pigment manufacturing business from the date of becoming subsidiary till March 31, 2024, whereas Fiscal Year 2023 represents the standalone operations of the Company. During Fiscal Year 2024, the major components of other expenses were repair and maintenance of ₹49.44 lakhs, commission of ₹42.94 lakhs, legal and professional charges of ₹24.85 lakhs, power and fuel expenses of ₹12.39 lakhs and rates and taxes of ₹11.97 lakhs.

### Tax Expense
